From Data to Evidence in English Language Research
 Carla Suhr, Terttu Nevalainen, Irma Taavitsainen, 2019-01-07
 From Data to Evidence in English Language Research draws on diverse digital data sources alongside more traditional linguistic corpora to offer new insights into the ways in which they can be used to extend and re-evaluate research questions in English linguistics. This is achieved for example by increasing data size, adding multi-layered contextual analyses, applying methods from adjacent fields and adapting existing data sets to new uses. Making innovative contributions to digital linguistics, the chapters in the volume apply a combination of methods to the increasing amount of digital data available to researchers to show how this data both established and newly available can be utilized, enriched and rethought to provide new evidence for developments in the English language.
