2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

Languages, Identities and Intercultural Communication in South Africa and Beyond Russell H

Kaschula, 2021-08-23 African countries and South Africa in particular being multilingual and multicultural societies make for exciting sociolinguistic and applied language analysis in order to tease out the complex relationship between language and identity. This book applies sociolinguistic theory as well as critical language awareness and translinguaging with its many facets to various communicative scenarios both on the continent and in South Africa in an accessible and practical way. Africa lends itself to such sociolinguistic analysis concerning language identity and intercultural communication. This book reflects consciously on the North-South debate and the need for us to create our own ways of interpretation emanating from the South and speaking back to the North and on issues that pertain to the South including southern Africa. Aspects such as language and power, language planning, policy and implementation, culture, prejudice, social interaction, translinguaging, intercultural communication, education, gender, and autoethnography are covered. This is a valuable resource for students studying African sociolinguistics, language and identity, and applied language studies. Anyone interested in the relationship between language and society on the African continent would also find the book easily accessible.
