**Shropshire** J. A. B. Somerset, 1994-01-01 The Records of Early English Drama volumes make available historical transcripts that provide evidence of early English drama music ceremonial dance and other forms of communal public entertainment in Britain before 1642 together with the necessary interpretive introductions and notes to explicate the materials for the reader Shropshire in two volumes is the eleventh publication in the series In the introduction Alan Somerset surveys the social and economic history of each major borough and provides a commentary on the major issues raised in the documents He discusses travelling performers routes the places they performed and the remarkable public exhibitions of high wire artists camels bears and giants The records for this county are rich and varied providing new detail about local playing and festivities From Shrewsbury for example comes the complete documentation of a unique semi circular outdoor amphitheatre The documents reveal much from robbery and riots to the sometimes acrimonious disputes that show the growing Puritan opposition to sports which attempted to combat an equally stubborn affection for traditional customs These records are an invaluable addition to the scholarship of early drama establishing as they do part of the total context of the great drama of Shakespeare his predecessors and his contemporaries Planningweek, 1993 **Planning Week**, 1993-09

Awakening to China's Rise Hugo Meijer, 2022-08-01 Awakening to China's Rise provides the most comprehensive analysis to date of how Europe's major powers have responded to the re emergence of China as a great power in world politics since the end of the Cold War To do so it puts forward a unique cross regional comparison of how the major European powers France Germany and the United Kingdom have confronted Chinese assertiveness both in the Asia Pacific and in Europe Firstly it analyses their response to China's increasingly muscular regional posture in the Asia Pacific through the development of diplomatic and security initiatives with partners in the region Secondly it delineates how they have confronted China's inroads into Europe looking at the measures that they have taken to tackle Chinese investments in and supply of technologies in strategic sectors such as critical national infrastructures dual use technologies and in the digital domain including Huawei's 5G networks A longstanding assumption in the IR literature has been that European foreign policies toward the People's Republic of China have been driven by a naïve and self interested focus on the economic opportunities presented by such a vast market overlooking security considerations This book challenges such common belief through a detailed examination of the policies of France Germany and the United Kingdom from 1989 to the present Its central argument is that whereas this assessment aptly characterized the first two post Cold War decades Beijing's growing assertiveness after 2009 caused the three major European powers to awaken to China's rise In the 2010s heightened threat perceptions of China coupled with increasingly competitive bilateral economic relations with the PRC have gradually and cumulatively caused the hardening of their policy goals which in turn translated into the formulation of new policy instruments to confront such a challenge To substantiate this argument the book relies on a large body of previously

undisclosed primary sources including 223 interviews conducted with senior officials in Europe Berlin Brussels London Paris in the United States Washington DC and in Asia Beijing Shanghai New Delhi Seoul declassified archival documents from France the UK and Germany leaked US diplomatic cables and new data on European naval deployments

**The Law of Insurance Warranties** Alastair Owen,2021-06-21 The book provides a detailed review of efforts to reform the law on insurance warranties in Australia New Zealand and the UK arguing that none of these have been successful The text proposes a radical new approach to reform of this area of the law demonstrating through detailed stress testing of these proposals that they would deliver more consistent and equitable outcomes than those achieved to date Reform of the historically inequitable law of insurance warranties in commercial insurance has been introduced in Australia New Zealand and most recently the UK This book demonstrates that all these reforms have flaws and that none of them can be relied upon to deliver consistently equitable and predictable outcomes in particular the UK s as yet largely untested Insurance Act 2015 is shown to have serious flaws that have not previously been identified Building on lessons from these three jurisdictions the book sets out an alternative approach for dealing with breaches of insurance warranties and demonstrates that this would consistently deliver better outcomes than any of the existing attempts at reforming this area of the law Providing an unprecedented multi jurisdictional review of the law on insurance warranties and in particular the treatment of warranties in the Insurance Act 2015 as well as outlining an innovative and radical alternative approach to reform the book will be of considerable interest and value to practitioners academics and students as well as to other common law jurisdictions contemplating reform of this area of the law

Freedom of Overflight Merinda E. Stewart,2021-10-25 Freedom of overflight is in large part uncontroversial However several recent international disputes and subsequent scrutiny of the exercise of coastal State jurisdiction in international airspace have highlighted the problematic legal nature of this freedom namely how a State s

creeping jurisdiction may encroach upon the rights of other States This groundbreaking book examines in depth the ambiguous areas at the nexus of air law and the law of the sea with respect to the balance between coastal State jurisdiction and freedom of overflight thus providing greater legal certainty regarding State actions involving overflight in international airspace The author identifies and thoroughly examines three highly salient matters impacting overflight in international waters the right of a State to establish safety zones around maritime constructions and the legitimacy of extending these safety zones to the airspace what if anything under international civil aviation law specifically prohibits a State from discriminating against the aircraft of another State in international airspace within its flight information region and whether air defence identification zones can be justified as customary international law Also considered is the law of the sea concerning transit passage through international straits and archipelagic sea lanes as applied to airspace users This is the first detailed study of overflight to combine the perspectives of international civil aviation law and the law of the sea As such it presents a comprehensive analysis of the legality of attempts by coastal States to exercise jurisdiction in international airspace over aircraft registered in other States thus taking a giant step towards determining what freedom of overflight entails by establishing its legitimate limitations It will be welcomed by practitioners policymakers and academics concerned with international transportation national defence international trade and other areas of international law
