simulants that exposed American civilians to radiation and other hazardous substances without their knowledge or consent during the Cold War Although Western biological and chemical weapons programs have been analyzed by a number of scholars Behind the Fog is a strong departure from the rest in that the United States radiological weapons program has been generally unknown to the public Martino Taylor documents the coordinated efforts of a small group of military scientists who advanced a four pronged secret program of human subject radiation studies that targeted unsuspecting Americans for Cold War military purposes Officials enabled such projects to advance through the layering of secrecy by embedding classified studies in other studies and through outright deception Agency and academic partnerships advanced supported and concealed the studies from the public at large who ultimately served as unwitting test subjects Martino Taylor s comprehensive research illuminates a dark chapter of government secrecy the military industrial academic complex and large scale organizational deviance in American history In its critical approach Behind the Fog effectively examines the mechanisms that allow large scale elite deviance to take place in modern society

DIFC Courts Practice Rupert Reed, Tom Montagu Smith, 2024-09-06 DIFC Courts Practice is endorsed by the DIFC Courts as the official companion to its Rules and is published in association with the DIFC Courts Written by a team of leading practitioners in the field this thoroughly revised second edition includes detailed commentary and incisive narrative discussion Part A focuses on the substantive law of the DIFC including the jurisdiction of its Courts while Part B comprises the full text of the rules alongside expert commentary on their application and interpretation with comprehensive analysis of all relevant case law *Educating Tomorrow's Engineers* Great Britain: Parliament: House of Commons: Science and

Technology Committee,2013-02-08 In the UK we teach young people to become computer users and consumers rather than programmers and software engineers This is creating a chronic skills gap in ICT We need around 82 000 engineers and technicians just to deal with retirements up to 2016 and 830 000 SET professionals by 2020 On the plus side the Government's proposal to include computer science as a fourth science option to count towards the EBac is welcomed The Committee also welcomes the EBac's focus on attainment of mathematics and science GCSEs but is concerned that subjects such as Design and Technology D T might be marginalised A Technical Baccalaureate TechBac is being designed but if it is to be a success schools should be incentivised to focus on the TechBac by making it equivalent to the EBac Reforms to vocational education following the Wolf Review meant that Level 2 of the Engineering Diploma a qualification highly regarded would count as equivalent to one GCSE despite requiring curriculum time and effort equivalent to several GCSEs The Engineering Diploma however is currently being redesigned as four separate qualifications The Committee also expressed concerns over the Department for Education's DfE lack of clarity on its research budget and use of evidence in decision making The DfE needs to place greater focus on gathering evidence before changes to qualifications are made and must leave sufficient time for evidence to be gathered on the effectiveness of policies before introducing further change The possibility of gathering evidence from randomised controlled trials RCTs should be seriously considered

A Generation on Trial Alistair Cooke,2014-08-19 The story of Whittaker Chambers HUAC and the case that defined the McCarthy era as reported by one of the twentieth century's most respected journalists In August 1948 a former Communist Party member named Whittaker Chambers testified before the House Un American Activities Committee that a secret cell of Communists had infiltrated Franklin D Roosevelt's New Deal administration Chief among the conspirators according to Chambers was Alger Hiss a former government attorney and State Department official who had taken part in the Yalta Conference and been instrumental in the creation of the United Nations Hiss's categorical denial of the charges which led Chambers to produce evidence linking both men to Soviet espionage quickly escalated into one of the most divisive episodes in American history and ignited the widespread fear and paranoia of the McCarthy era As the US correspondent for the Manchester Guardian Alistair Cooke reported extensively on the Hiss affair In an atmosphere that he memorably compares to that of a seventeenth century religious war Cooke maintained a clear head and his signature intellectual rigor A Generation on Trial which begins with a brilliantly succinct summary of the case We are about to look at the trials of a man who was judged in one decade for what he was said to have done in another is both a fascinating historical document and a stirring example of journalistic integrity

Boutwell Jeffrey Boutwell,2025-01-21 The first major biography of the statesman who fought for racial and economic equality alongside Presidents Lincoln and Grant During his seven decade career in public life George Sewall Boutwell sought to redeem America's promise of racial equality economic equity and the principled use of American power abroad From 1840 to 1905 Boutwell was at the center of efforts to abolish slavery establish the Republican Party assist

President Lincoln in funding the Union war effort facilitate Lincoln's Emancipation Proclamation impeach President Andrew Johnson and frame and enact the Fourteenth and Fifteenth civil rights amendments He helped lay the foundations of the modern American economy with President Grant investigated white terrorism in Mississippi in the 1870s and opposed American imperialism following the Spanish American War alongside Andrew Carnegie Mark Twain and Booker T Washington The son of a Massachusetts farming family of modest means George Boutwell would do battle during his career with American political royalty including Henry Cabot Lodge and Teddy Roosevelt The first major biography of an important public figure who has long been hiding in plain sight Boutwell is as much a history of nineteenth century US politics as it is a critique of the failures of governance during a turbulent and formative period in American history *Brief Interventions for Risky Drinkers* Antoni Gual, Peter Anderson, Hugo López-Pelayo, Jillian Reynolds, 2016-06-29 Alcohol is the sixth leading risk factor for disability and premature death all over the world and one of the leading causes of premature mortality in western societies it is a leading risk factor for death in young and middle age males Heavy drinking accounts for about two thirds of the burden of disease attributable to alcohol In the early 1980s screening and brief interventions SBI in primary health care settings were proposed as effective strategies to identify risky drinkers and to help them reduce their drinking Since then a growing body of evidence including several meta analysis and Cochrane reviews has shown the efficacy and effectiveness of SBI in primary health settings However demonstrating the effectiveness of SBI has not been insufficient to facilitate its general implementation in the routines of primary health care physicians and in fact the dissemination of SBI has proven to be a difficult business Qualitative and quantitative research has identified most of the facilitators and barriers for its implementation and publicly funded research has been earmarked to address the dissemination problems worldwide Some examples are the World Health Organization Phase III and Phase IV studies on the identification and management of alcohol related problems in primary care EU funded projects PHEPA AMPHORA ODHIN BISTAIRS the UK SIPS trials and the SBIRT developments sponsored by the Substance Abuse what length should they be is there a need for booster sessions is there added value of a motivational approach These questions together with other relevant aspects of SBI need ongoing research In recent years SBIs have been tested in settings other than primary health care including hospitals accident and emergency rooms criminal justice colleges and universities social services and pharmacies In some of those areas the evidence is scarce for example pharmacies while in others it is very promising for example students and hospitals New technologies have also offered the possibility of online tools and in the last few years different digital based applications have been tested successfully as new ways to deliver effective SBIs to larger amounts of people Brief interventions have also spread to drugs other than alcohol This book aims to be an update of the state of the art of brief advice It is a compilation of articles published by some of the most relevant researchers in the field in *Frontiers in Psychiatry* between 2014 and 2016

Applications of Rehabilitation Engineering Technologies for the Intervention of Neural and Motor

Impairment Post Stroke Dong Feng Huang,Guanglin Li,2020-01-10 Stroke is the leading cause of disability worldwide Stroke survivors often have motor impairments which contribute to upper limbs dysfunctions reduced balance postural control and reduced mobility and proprioception These physical symptoms lead to reduced social participation and poor quality of life Over the past ten years there had been an enormous focus on the use of virtual reality VR and other technologies to improve clinical outcomes for people with stroke These technologies include large scale bespoke manufactured immersive virtual reality system or home based rehabilitation device such as the commercially available device Nintendo Wii and Microsoft Xbox The clinical efficacy of these rehabilitation technologies had been studied extensively but our understanding of the underlying mechanism of recovery induced by these technologies is poor There are two aspects of recovery must be considered One is the learning compensation strategies where patients acquired new skills to improve functional abilities The other aspect is the neuroplasticity mechanism which leads to cortical map reorganisation The patient is able to re use the same body segments in the same way as they did before the stroke Published studies generally reported improvement in upper limb function lower limb function balance and gait This leads to the uncertainty whether these technologies are effective in promoting recovery at neural level or functional level With the advance in technology monitoring techniques such as neural imaging motion analysis and EMGs devices have broad applications in the understanding of neural recovery post stroke Studies that utilize functional outcome measures or observational design may be more effective in identifying functional recovery A combination of the two designs may be helpful to provide new insights on the recovery mechanism induced by rehabilitation devices

At the Breaking Point of History Janet Phelan,2021-09-14 Today we find ourselves embroiled in the midst of a pandemic one which has collapsed economies caused death by starvation and has resulted in severe new restrictions on civil rights in the US and elsewhere Numerous medical professionals and researchers are questioning the genesis of the Covid 19 agent whether or not it was bioengineered and deliberately released and are also questioning the course taken to shut down whole countries and demand that people stay at home Questions have also been raised as to the verifiability of the numbers alleged to have died from this novel coronavirus pointing to dictates from the CDC to list deaths not directly caused by the virus as virus caused deaths In the midst of this chaos these articles written long before the Covid 19 pandemic point to a monstrous political agenda implicating media government and foreign nations in the plan to launch this As the country begins to reopen the trajectory of these articles should result in grave concern for what the future may hold

The Routledge International Handbook of Criminology and Human Rights Leanne Weber, Elaine Fishwick, Marinella Marmo,2016-08-25 The Routledge International Handbook of Criminology and Human Rights brings together a diverse body of work from around the globe and across a wide range of criminological topics and perspectives united by its critical application of human rights law and principles This collection explores the interdisciplinary reach of criminology and is the first of its kind to link criminology and human rights This text is divided into six sections each with an introduction and an overview provided by one of the

editors The opening section makes an assessment of the current standing of human rights within the discipline Each of the remaining sections corresponds to a substantive area of harm prevention and social control which together make up the main core of contemporary criminology namely criminal law in practice transitional justice peacemaking and community safety policing in all its guises traditional and emerging approaches to criminal justice and penalty both within and beyond the prison This Handbook forms an authoritative foundation on which future teaching and research about human rights and criminology can be built This multi disciplinary text is an essential companion for criminologists sociologists legal scholars and political scientists

In-Flight Simulators and Fly-by-Wire/Light Demonstrators Peter G. Hamel, 2017-03-15 This book offers the first complete account of more than sixty years of international research on In Flight Simulation and related development of electronic and electro optic flight control system technologies Fly by Wire and Fly by Light They have provided a versatile and experimental procedure that is of particular importance for verification optimization and evaluation of flying qualities and flight safety of manned or unmanned aircraft systems Extensive coverage is given in the book to both fundamental information related to flight testing and state of the art advances in the design and implementation of electronic and electro optic flight control systems which have made In Flight Simulation possible Written by experts the respective chapters clearly show the interdependence between various aeronautical disciplines and in flight simulation methods Taken together they form a truly multidisciplinary book that addresses the needs of not just flight test engineers but also other aeronautical scientists engineers and project managers and historians as well Students with a general interest in aeronautics as well as researchers in countries with growing aeronautical ambitions will also find the book useful The omission of mathematical equations and in depth theoretical discussions in favor of fresh discussions on innovative experiments together with the inclusion of anecdotes and fascinating photos make this book not only an enjoyable read but also an important incentive to future research The book translated from the German by Ravindra Jategaonkar is an extended and revised English edition of the book *Fliegende Simulatoren und Technologi* edited by Peter Hamel and published by Appelhaus in 2014

Cognition and Instruction David Klahr, 2014-01-14 First published in 1987 The author argues that information processing psychology has come to dominate the experimental study of complex human behaviour Such rapid success suggests that the approach will have as much of an impact on psychology in the field as it has had on psychology in the laboratory The chapters in this volume indicate the extent to which this potential has already begun to be realized The book is divided into four parts The first three parts include sets of research contributions followed by discussions and the fourth part contains three chapters that offer critiques syntheses and evaluations of various aspects of the preceding papers

Historical Origins of International Criminal Law Morten Bergsmo, CHEAH Wui Ling, YI Ping, 2014-12-12 The historical origins of international criminal law go beyond the key trials of Nuremberg and Tokyo but remain a topic that has not received comprehensive and systematic treatment This anthology aims to address this lacuna by examining trials

proceedings legal instruments and publications that may be said to be the building blocks of contemporary international criminal law It aspires to generate new knowledge broaden the common hinterland to international criminal law and further consolidate this relatively young discipline of international law The anthology and research project also seek to question our fundamental assumptions of international criminal law by going beyond the geographical cultural and temporal limits set by the traditional narratives of its history and by questioning the roots of its substance process and institutions Ultimately we hope to raise awareness and generate further discussion about the historical and intellectual origins of international criminal law and its social function The contributions to the three volumes of this study bring together experts with different professional and disciplinary expertise from diverse continents and legal traditions Volume 1 comprises contributions by prominent international lawyers and researchers including Judge LIU Daqun Professor David Cohen Geoffrey Robertson QC Professor Paulus Mevis and Professor Jan Reijntjes
