Children Above 180 IQ Stanford-Binet Leta Stetter Hollingworth, 2015-01-06 Example in this ebook This study is founded upon the work of Francis Galton on the one hand and of Albert Binet on the other It goes back to Galton's Hereditary Genius read as a prescribed reference in the courses of Professor Edward L Thorndike in 1912 and to the publication in 1916 of Professor Lewis M Terman's Stanford Revision of the Binet Simon Scale for Measuring Intelligence It comprises observations measurements and conversations covering a period of twenty three years during which acquaintanceships and friendships every one of them delightful have been formed and maintained with the twelve individuals who form the basis of the study It was in November 1916 shortly after taking appointment as instructor in educational psychology at Teachers College Columbia University that I saw for the first time a child testing above 180 IQ S B I was teaching a course in the psychology of mentally deficient children and it seemed to me that my class should if possible observe under test conditions one bright child for the sake of contrast Accordingly I asked whether any teacher present could nominate a very intelligent pupil for demonstration Miss Charlotte G Garrison and Miss Agnes Burke teachers in the Horace Mann School Teachers College New York City thereupon nominated the child who is called E in this monograph E was

presented at the next meeting of the class It required two full classroom periods to test this child to the limits of the Stanford Binet Scale which had just then been published E exhausted the scale without being fully measured by it achieving an IQ of at least 187 He was on that date 8 years 4 months old This IQ of at least 187 placed E in Galton s Class X of able persons i e more than six grades removed from mediocrity Taking 1 PE dis as one grade it placed him at least plus 11 PE from the norm for 1 PE Probable Error equals 8 IQ according to Terman s original distribution of 905 school children This appeared as sufficiently striking to warrant permanent recording since it would rate E as one in a million for statistical frequency assuming zeal and power of working to be also abundantly present I did not at that time have any expert knowledge of highly intelligent children I had been working for some years in the hospitals of New York City with persons presented for commitment to reformatories prisons and institutions for mental defectives I had tested thousands of incompetent persons a majority of them children with Goddard s Revision of the Binet Simon Scale scarcely ever finding anyone with an IQ rating as high as 100 This thoroughgoing experience of the negative aspects of intelligence rendered the performance of E even more impressive to me than it would otherwise have been I perceived the clear and flawless working of his mind against a contrasting background of thousands of dull and foolish minds It was an unforgettable observation To be continue in this ebook
