Infrastructures for Virtual Enterprises Luis M. Camarinha-Matos, Hamideh Afsarmanesh, 2013-03-09 The area of virtual organizations and industrial virtual enterprises in particular is attracting a large and growing interest both in terms of the research and development and the implementation of new business practices An ever increasing number of international projects and national initiatives have been launched recently Most of the earlier efforts are focused on the development of supporting infrastructures although more and more initiatives now pursue the exploitation of this concept in business terms Being a recent research and development area and in spite of the mentioned interest there is a lack of a structured and comprehensive text that can be used as a reference source Most available literature is dispersed in several conference proceedings journals and book chapters This book represents an attempt towards such structured text Although the book was prepared in the framework of PRO VE 99 a working conference on infrastructures for virtual enterprises organized by the Esprit project PRODNET II and IFIP it has the goal of covering more generic VE requirements and addressing several other approaches and important aspects in this paradigm
