Crouch, Jonathan Stökl, Anna Elise Zerneck, 2012-12-06 This volume brings together experts in the study of ancient prayers

and divination methods to analyse the variety of means by which human beings sought to communicate with their gods and by which the gods were seen to communicate with their worshippers In a departure from previous scholarship the volume brings together the study of prophecy as an intuitive form of divination with the study of technical methods of communication and other forms of institutionalised communication such as prayer Such a format allows divine human communication to be studied in both directions simultaneously the means by which the divine communicates to human beings through divination and the means by which human beings communicate with the divine through prayer This new perspective on the study of divine human communication allows scholars to better appreciate the way in which communication and the relationship between heaven and earth was conceived in the ancient near East *Advanced Public Speaking* Dr. Ruth

Livingston,2015-01-23 The text provides instruction on how to give different types of presentations and how to improve upon other communication skills including listening Topics include harnessing the fear of public speaking applying immediacy storytelling motivating others listening actively interviewing successfully lecturing and conducting workshops effectively speaking off the cuff selling yourself and your business and presenting for special occasions Aristotles Canons of Rhetoric are also discussed as a foundation to organizing and delivering dynamic presentations The book is ideal as a text for an Advanced Public Speaking course **Death of the Daily News** Andrew Conte,2022-09-20 The City of McKeesport in southwestern

Pennsylvania once had a population of more than fifty thousand people and a newspaper that dated back to the nineteenth century Technology has caused massive disruption to American journalism throwing thousands of reporters out of work closing newsrooms and leaving vast areas with few traditional news sources including McKeesport With the loss of their local paper in 2015 residents now struggle to make sense of what goes on in their community and to separate facts from gossip often driven by social media The changes taking place in this one Pennsylvania community are being repeated across the United States as hundreds of local newspapers close creating news deserts and leaving citizens with little access to reliable local journalism The obituary for local news however does not have to read all bad Even in the bleakest places citizens are discovering what happens in their communities and becoming gatekeepers to information for the people around them In McKeesport citizens are attempting to make sense of the news on their own for better and worse This experiment not only offers clues about what happens after a local newspaper dies but also provides guidance to the way forward **Screwball**

Television David Scott Diffrient,David Lavery,2010-04-13 Bringing together seventeen original essays by scholars from around the world Screwball Television offers a variety of international perspectives on Gilmore Girls Adored by fans and celebrated by critics for its sophisticated wordplay and compelling portrayal of a mother daughter relationship this contemporary American TV program finally gets its due as a cultural production unlike any other one that is beholden to Hollywood s screwball comedies of the 1930s steeped in intertextual references and framed as a kinder gentler kind of cult television series in this tightly focused yet wide ranging collection This volume makes a significant contribution to television

studies genre studies and women s studies Screwball Television seeks to bring Gilmore Girls more fully into academic discourse not only as a topic worthy of critical scrutiny but also as an infinitely rewarding text capable of stimulating the imagination of students beyond the classroom The Way of Dialogue Ronald Gordon,2020-02-17 Distrust divisiveness and conflict run rampant in today s world Human relations are strained communication gaps and breakdowns pervade Yet whether within couples families friendships workplaces communities or institutions across our nation and planet defending our own positions and attacking those of the Other has not solved our problems Maybe it s time to explore how to communicate together in ways that bring connection and healing In our stressful era the practice of person centered dialogue offers both hope and help Diversity, equity and inclusion in sport and leisure Katherine Dashper,Thomas Fletcher,2016-01-08 Despite the mythology of sport bringing people together and encouraging everyone to work collectively to success modern sport remains a site of exclusionary practices that operate on a number of levels Although sports participation is in some cases at least becoming more open and meritocratic at the management level it remains very homogenous dominated by western white middle aged able bodied men This has implications both for how sport develops and how it is experienced by different participant groups across all levels Critical studies of sport have revealed that rather than being a passive mechanism and merely reflecting inequality sport via social agents interactions with sporting spaces is actively involved in producing reproducing sustaining and indeed resisting various manifestations of inequality The experiences of marginalised groups can act as a resource for explaining contemporary political struggles over what sport means how it should be played and by whom and its place within wider society Central to this collection is the argument that the dynamics of cultural identities are contextually contingent influenced heavily by time and place and the extent to which they are embedded in the culture of their geographic location They also come to function differently within certain sites and institutions be it in one s everyday routine or leisure pursuits such as sport Among the themes and issues explored by the contributors to this volume are social inclusion and exclusion in relation to class race and ethnicity gender and sexuality social identities and authenticity social policy deviance and fandom This book was published as a special issue of Sport in Society *Autistic Community and the Neurodiversity Movement* Steven K. Kapp,2019-11-07 This open access book marks the first historical overview of the autism rights branch of the neurodiversity movement describing the activities and rationales of key leaders in their own words since it organized into a unique community in 1992 Sandwiched by editorial chapters that include critical analysis the book contains 19 chapters by 21 authors about the forming of the autistic community and neurodiversity movement progress in their influence on the broader autism community and field and their possible threshold of the advocacy establishment The actions covered are legendary in the autistic community including manifestos such as Don t Mourn for Us mailing lists websites or webpages conferences issue campaigns academic project and journal a book and advisory roles These actions have shifted the landscape toward viewing autism in social terms of

human rights and identity to accept rather than as a medical collection of deficits and symptoms to cure

The 21st Century Media (r)evolution Jim Macnamara, 2010 The emergence of new media and social media is widely discussed in contemporary society However media and public communication are mostly analyzed within particular theoretical frameworks and within specific disciplinary fields Such approaches have created polarized views on media and communication and fail to create an understanding of the interdependencies between these fields This book expertly synthesizes competing theories and disciplinary viewpoints integrates scholarly and cutting edge research and examines international data from fast growing markets including China to provide a comprehensive holistic view of the twenty first century r evolution in media and public communication The book identifies how the changes are located in practices rather than technologies and that these practices are emergent in highly significant ways Engaging and accessible the book is essential reading for media scholars and communication professionals and a valuable text for courses in media studies journalism advertising public relations and organisational and political communication
