Vacationing in Dictatorships Adelina Stefan, 2024-12-15 *Vacationing in Dictatorships* examines the political effects of international tourism in socialist Romania and Francoist Spain in the postwar era. Despite sharp economic and political differences between the two dictatorial regimes at the start of the Cold War, significant similarities existed as both states took advantage of international tourism to improve their image abroad and pursued processes of economic modernization to acquire hard currencies. By the end of the 1970s, though the two countries achieved rather different results in terms of tourism development despite the fact that both shared many features in the 1940s and 1950s. By comparing the rise and evolution of international tourism on different sides of the Iron Curtain, Adelina Stefan provides a different assessment of the geopolitics of postwar Europe that further refines the Cold War's geographies separating Eastern and Western Europe. As a result, *Vacationing in Dictatorships* reveals a new perspective on the Cold War that reveals not only the developmental similarities between Eastern and Southern Europe but also the ideological struggle that pitted socialist East against capitalist West.

The Russian Socialist Revolutionary Party Before the First World War Manfred Hildermeier, 2000 The Socialist Revolutionary Party played an important role in the history of the Russian revolutionary movement. The author seeks to explain why this party, which continued the tradition of the 1870s, did not ultimately prevail in an agrarian country like the Tsarist empire. Using a wealth of printed sources and for the first time drawing upon materials from the archive of the Central Committee of the PSR, this study provides a detailed analysis of the theoretical foundations of the party as well as its organisational structure and political practice during the first Russian Revolution. Manfred Hildermeier is Professor am Seminar für Mittlere und Neuere Geschichte der Universität Göttingen.

Health and Development International Monetary Fund, 2004-11-23 The past century has been marked by rapid advances in human welfare. People in most parts of the world are healthier and are living longer. While this trend is likely to continue, hopes are fading in some regions where progress slowed or stopped in the 1990s, primarily as a result of the AIDS epidemic. This compilation of articles published over the past five years in the pages of *F&D* looks at the important links between health and economic progress. Articles range over a variety of topics from the Millennium Development Goals and their health-related targets for 2015 to the economics of tobacco control. Several articles examine the impact of AIDS and the global reaction, while others look at debt and the intellectual property aspects of health care.
