Lewis,2017-09-08 Product Stewardship in Action describes how and why leading companies are taking responsibility for the
environmental impact of their products and packaging Product stewardship often referred to as extended producer
responsibility or EPR is the idea that everyone that benefits commercially from a product including manufacturers
distributors and retailers has a shared responsibility to minimize its environmental impacts Written primarily for a business
audience it draws on the knowledge and experience of industry practitioners and other experts to provide a structured
approach to product responsibility within firms This will help those new to the field as well as more experienced practitioners
to develop an effective response to stakeholder concerns about the environmental impacts of their products and packaging
Unlike other resources on product stewardship and EPR which tend to focus on the design or evaluation of public policy this
book highlights the business case for action It argues that companies can achieve shared value both public and commercial
value when they take a proactive and knowledge based approach to the life cycle management of their products Product
Stewardship in Action focuses on product stewardship as an effective business strategy rather than a philanthropic exercise
To be effective it needs to be based on a good understanding of product impacts and stakeholder concerns and the risks and
opportunities that these present to the business The most effective responses will be those that address material issues in the
product life cycle while supporting the achievement of other corporate goals and priorities *The EBay Price Guide* Julia L.
