and Susan Shaman argue that too many institutional leaders and policy makers do not understand how deeply the consumer markets they promoted have changed American higher education. Instead of functioning as a single integrated industry, higher education is in fact a collection of segmented and more or less separate markets. These markets have their own distinctive operating constraints and logics, especially regarding price. But those most responsible for federal higher education policy have made a muck of the enterprise while state policy making has all but disappeared, the victim of weak imaginations, insufficient funding, and an aversion to targeted investment. Chapter by chapter, this compelling text draws on new data developed by the authors in a Gates Foundation funded project to describe the landscape: how the market for higher education distributes students among competing institutions; what the job market is looking for; how markets differ across the fifty states; and how the higher education market determines the kinds of faculty at different kinds of institutions. The volume concludes with a three-pronged set of policies for making American higher education mission-centered as well as market-smart. Although there is no one-size-fits-all approach for reforming higher education, this clearly written book will productively advance understanding of the challenges colleges and universities face by providing a mapping of the configuration of the market for an undergraduate education.

The book also addresses a range of other matters that influence careers in higher education: once a candidate is hired in a faculty position, such matters as the tenure and promotion process and how to succeed in other aspects of the professorial role: research, service, teaching, and as well as how to avoid pitfalls, political and ethical aspects in such positions.

What will be the impact of digital and distance learning of commercial for-profit new entrants to the higher education market of government austerity of globalization of student consumerism? Exploring the origins and the concept, the idea and the ideal of the university, this Very Short Introduction discusses one of the world's oldest, most resilient, and most adaptable institutions. David Palfreyman and Paul Temple consider the links between universities and the economy and the role of universities within society. Highlighting some of the key questions surrounding the position of universities, they ask how the university can be politically accountable for its taxpayer funding, if it needs to be autonomous to function effectively as a public good. Are professors professional enough in their teaching practices at a time that increasing tuition fees transform students more and more into consumers? And just what does academic freedom for university faculties really entail?
