

FINANCIAL ACCOUNTING AND REPORTING

Fundamental Accounting Concepts

1. **Entity Concept** – An accounting entity is an organization or a section of an organization that stands apart from other organizations and individuals as a separate economic unit.
2. **Periodicity Concept** – An entity's life can be meaningfully subdivided into equal time periods for reporting purposes.
 - Accounting period/operating cycle
 - Financial information – as of

Calendar – January-December

Fiscal – any month for the next 12 months
3. **Stable Monetary Unit Concept** – The Philippine peso is a reasonable unit of measure and that its purchasing power is relatively stable.
 - Common currency unit of measure
 - We do not account inflation

Historical Report – actual transactions

4. **Going Concern** – foreseeable future
 - for at least 12 months after the last reporting period
 - stop operation, liquidation, bankruptcy – accounting treatment

BASIC PRINCIPLES

GAAP (generally accepted accounting principles) – The set of guidelines and procedures that constitute acceptable accounting practice at a given time.

Objectivity Principle – accounting records and statements are based on the most reliable data available so that they will be as accurate and as useful as possible.

- Reliable data are verifiable when they can be confirmed by independent observers.

Historical Cost – stated that acquired assets should be recorded at their actual cost and not at what management thinks they are worth as at reporting date.

Revenue Recognition Principle – Revenue is to be recognized in the accounting period when goods are delivered or services are rendered or performed.

- Delivered – product; rendered – service

Expense Recognition Principle – Expenses should be recognized in the accounting period in which goods and services are used up to produce revenue and not when the entity pays for those goods and services.

- Expense is recognized when incurred
- Matching principle

Adequate Disclosure – Requires that all relevant information be disclosed in the financial statement / notes.

Materiality – Financial reporting is only concerned with information that is significant enough to affect evaluations and decisions.

- Doctrine of convenience
- Professional judgment

Consistency Principle – The firms should use the same accounting method from period to period to achieve comparability over time within a single enterprise.

UNDERLYING ASSUMPTIONS

Accrual Basis – the effects of transactions and other events are recognized when they occur and not as cash or its equivalent is received or paid.

- In accrual accounting, the timing of cash flows is relatively immaterial for determining when to recognize revenues and expenses.

Going Concern – financial statements are normally prepared on the assumption that an enterprise is a going concern and will continue in operation for the foreseeable future.

QUALITATIVE CHARACTERISTICS OF FINANCIAL STATEMENTS

Understandability – readily understandable by users

Relevance – to be useful, information must be relevant to the decision-making needs of users.

- information has the quality of relevance when it influences the economic decisions of users by helping them evaluate past, present or future events.
- **Predictive Value** – financial information is used to predict future outcomes.
- **Confirmatory Value** – used to confirm earlier expectations.
