The Role of the Speech-Language Pathologist in RtI Wayne A. Foster, 2018-01-08 The Role of the Speech Language Pathologist in RtI Implementing Multiple Tiers of Student Support is an innovative resource for school based speech language pathologists SLPs The author examines the current interaction among special and general educators and identifies how SLPs best fit into a multitiered response to instruction process This collaboration requires school staff share the same vision on the operation of the system understand their respective roles and merge the curricular with the developmental perspective to build basic skills in support of student performance growth General educators have traditionally utilized the language of curriculum e.g. standards pacing guides formative and summative assessments to talk about student goals and achievement Special educators including SLPs most often utilize the language of development e.g. norms percentile ranks development milestones to measure student growth The Role of the Speech Language Pathologist in RtI assesses this apparent clash in nomenclature and identifies new ways for collaboration and cooperation among faculty and administration In order for the SLP to be an effective partner in the development and implementation of RtI the author proposes that SLPs should understand the language of general education be able to translate the curricular needs of students into skill based units that can be measured and progress monitored have full understanding of the developmental progression of skills and how that progression links to curriculum standards and be knowledgeable on evidence based practices that can have a meaningful impact on closing developmental gaps and result in higher achievement outcomes This text provides the blueprint for the implementation of a system of student support that was envisioned in the 2004 reauthorization of the Individuals with Disabilities Education Improvement Act IDEIA Unlike other books on RtI this essential resource addresses the very specific roles that different school level professionals must play to make the system effective No other text provides SLPs with such a comprehensive schoolwide perspective on the different roles in the process the different languages used by the professionals in those roles and how to navigate those different perspectives

Lewis, 1995-01-27 How do children become eager motivated learners and caring responsible citizens Educating Hearts and Minds first published in 1995 is a portrait of Japanese preschool and early elementary education which examines these questions Its thesis which will surprise many Americans is that Japanese schools are successful because they meet children s needs for friendship belonging and contribution This book brings to life what actually happens inside Japanese classrooms What do children learn How do they learn What values are emphasised and how are they taught In a sharp departure from most previous accounts this book

suggests that Japanese education succeeds because all children not just the brightest or best behaved somehow come to feel like valued members of the school community Ironically Japanese teachers credit John Dewey and other progressive Western educators for many of the techniques that make Japanese schools both caring and challenging This book brings to a wider readership the voices of Japanese classroom teachers voices that are at once deeply consonant with Western aspirations and deeply provocative
