Intellectual Teamwork Jolene Galegher,Robert E. Kraut,Carmen Egido,2014-01-14 This book seeks to establish an interdisciplinary applied social scientific model for researchers and students that advocates a cooperative effort between machines and people After showing that basic research on social processes offers much needed guidance for those creating technology and designing tools for group work its papers demonstrate the mutual relevance of social science and information system design and encourage better integration of these disciplines This comprehensive collection closely examines the variety of electronic tools being deployed to solve traditional problems in communication and coordination Unfortunately research shows that these tools have not been as successful as their designers had envisioned partially because they were not always produced with the needs and goals of their human users in mind The editors goal is to entice more social scientists to orient their research around questions of practical interest to information system designers and to convince designers to search for the knowledge about social and organizational behavior that would make their tools more useful

Producing Queer Youth Lauren S.

Berliner,2018-06-14 Producing Queer Youth challenges popular ideas about online media culture as a platform for empowerment cultural transformation and social progress Based on over three years of participant action research with queer teen media makers and textual analysis of hundreds of youth produced videos and popular media campaigns the book unsettles assumptions that having a voice and gaining visibility and recognition necessarily equate to securing rights and resources Instead Berliner offers a nuanced picture of openings that emerge for youth media producers as they negotiate the structures of funding and publicity and manage their identities with digital self representations Examining youth media practices within broader communication history and critical media pedagogy she forwards an approach to media production that re centers the process of making as the site of potential learning and social connection Ultimately she reframes digital media participation as a struggle for rather than in itself evidence of power
