The Information Literacy Framework Heidi Julien,Melissa Gross,Don Latham,2020-02-07 This book helps demystify how to incorporate ACRL s Framework for Information Literacy for Higher Education into information literacy instruction in higher education as well as how to teach the new Framework to pre service librarians as part of their professional preparation This authoritative volume copublished by the Association for Library and Information Science Education ALISE demonstrates professional practice by bringing together current case studies from librarians in higher education who are implementing the Framework for Information Literacy for Higher Education as well as cases from educators in library and information science who are working to prepare their pre service students to practice in the new instructional environment Instructional librarians administrators and educators will benefit from the experiences the people on the ground who are actively working to make the transition to the Framework in their professional practice

Survivability under Overheating Afroditi Synnefa,Shamila Haddad,Priya Rajagopalan,Matthaios Santamouris,2020-12-23 The present book discusses three significant challenges of the built environment namely regional and global climate change vulnerability and survivability under the changing climate Synergies between local climate change energy consumption of buildings and energy poverty and health risks highlight the necessity to develop mitigation strategies to counterbalance overheating impacts The studies presented here assess the underlying issues related to urban overheating Further the impacts of temperature extremes on the low income population and increased morbidity and mortality have been discussed The increasing intensity duration and frequency of heatwaves due to human caused climate change is shown to affect underserved populations Thus housing policies on resident exposure to intra urban heat have been assessed Finally opportunities to mitigate urban overheating have been proposed and discussed

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee,2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012

highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

The Metric Tide James Wilsdon, 2016-01-20 Represents the culmination of an 18 month long project that aims to be the definitive review of this important topic Accompanied by a scholarly literature review some new analysis and a wealth of evidence and insight the report is a tour de force a once in a generation opportunity to take stock Dr Steven Hill Head of Policy HEFCE LSE Impact of Social Sciences Blog A must read if you are interested in having a deeper understanding of research culture management issues and the range of information we have on this field It should be disseminated and discussed within institutions disciplines and other sites of research collaboration Dr Meera Sabaratnam Lecturer in International Relations at the School of Oriental and African Studies University of London LSE Impact of Social Sciences Blog Metrics evoke a mixed reaction from the research community A commitment to using data and evidence to inform decisions makes many of us sympathetic even enthusiastic about the prospect of granular real time analysis of our own activities Yet we only have to look around us at the blunt use of metrics to be reminded of the pitfalls Metrics hold real power they are constitutive of values identities and livelihoods How to exercise that power to positive ends is the focus of this book Using extensive evidence gathering analysis and consultation the authors take a thorough look at potential uses and limitations of research metrics and indicators They explore the use of metrics across different disciplines assess their potential contribution to the development of research excellence and impact and consider the changing ways in which universities are using quantitative indicators in their management systems Finally they consider the negative or unintended effects of metrics on various aspects of research culture Including an updated introduction from James Wilsdon the book proposes a framework for responsible metrics and makes a series of targeted recommendations to show how responsible metrics can be applied in research management by funders and in the next cycle of the Research Excellence Framework The metric tide is certainly rising Unlike King Canute we have the agency and opportunity and in this book a serious body of evidence to influence how it washes through higher education and research

Education in a Federal UK John Furlong, Ingrid Lunt, 2019-10-23 Britain's two recent referenda on Brexit 2016 and on Scottish independence 2014 have raised in the public mind fundamental questions about the future of the UK It seems that for the first time the public the media and the political elite have woken up to the fact that in different parts of the UK there are different histories different aspirations and different imagined futures in relation to a whole range of vitally important political issues But what the public debate often fails to recognise is that in many areas of public life perhaps especially education the UK is already a federal state and in key respects has been so for

many years The aim of this volume is therefore to take stock to try and capture what the current state of educational policy and practice is across the whole of the UK This has been achieved by commissioning two different papers from each of the four countries Wales Scotland Northern Ireland and England The first is an overview exploring the distinctive history principles and current policies of each country The second paper has been specifically chosen as a case study of a key policy that highlights the distinctiveness of each country the Foundation Phase for Wales assessment policy in Scotland shared education initiatives in Northern Ireland and higher education policy in England Taken together these eight papers give an important insight into the complexities of educational policy and practice across the whole of the UK today This volume was originally published as a special issue of Oxford Review of Education

2024-25 UPSC CDS General Knowledge Solved Papers YCT Expert Team , 2024 25 UPSC CDS General Knowledge Solved Papers 400 795 E This book contains 22 sets of the previous solved papers and 2640 objective questions

Assessment Policy Reform Tina Isaacs,Iasonas Lamprianou,2020-05-21 This book highlights the impact of policy and politics on assessment across the globe With contributions from England the Irish Republic Northern Ireland Norway Sweden Switzerland and Wales it explores state led assessment policies and practices that have been the subject of much debate We are experiencing a shift from using assessments especially national tests as measurement instruments designed to produce information to a reliance on tests to influence policy and instruction Once tests become high stakes for students teachers and schools even those that might have been reasonable monitors of educational success can lose dependability and credibility However not all countries assessment policies follow the same model and the contributors explore and analyse a range of different national and supra national assessment policy approaches and perspectives The chapters identify the impetus behind changing assessment policies and practices and analyse ways forward and innovative approaches Readers can draw their own conclusions about which model s can provide the best outcomes for learners surely the most important part of the equation This book was originally published as a special issue of Assessment in Education Principles Policy Practice
