Historical Perspectives of Fisheries Exploitation in the Indo-Pacific Joseph Christensen, Malcolm Tull, 2014-04-01 The waters of the Indo Pacific were at the centre of the global expansion of marine capture fisheries in the twentieth century yet surprisingly little has been written about this subject from a historical perspective This book the first major study of the history of fishing in Asia and Oceania presents the case studies completed through the History of Marine Animal Populations HMAP initiative It examines the marine environmental history and historical marine ecology of the Indo Pacific during a period that witnessed the dramatic escalation of industrial fishing in these seas **Perspectives on Oceans Past** Kathleen Schwerdtner Máñez, Bo Poulsen, 2016-05-24 Marine environmental history analyses the changing relationships between human societies and marine natural resources over time This is the first book which deals in a systematic way with the theoretical backgrounds of this discipline Major theories and methods are introduced by leading scholars of the field The book seeks to encapsulate some of the major novelties of this fascinating new discipline and its contribution to the management conservation and restoration of marine and coastal ecosystems as well as the cultural heritages of coastal communities in different parts of the world *The Catch* Anna Clark, 2017-10-01 In every coastal town in Australia there s a bait shop and a boat ramp and in garages around the country fishing rods are strung up waiting for their next outing Many of us have a special fishing spot and families pass on tips from generation to generation and exchange fishy tales of amazing catches and near misses Bringing her personal passion for throwing in a line author Anna Clark celebrates the enduring pleasure of fishing in *The Catch The Story of Fishing in Australia* This book charts the history of fishing from the first known accounts of Indigenous fishing and early European encounters with Australia s waters to the latest fishing fads from the introduction of trout and fly fishing to the challenges of balancing needs of commercial and recreational fishers Fishing personality Rob Paxevanos host of Fishing Australia says that *The Catch* is by far my best fishing read to date [The Oxford Handbook of Environmental and Natural Resources Law in India](#) Philippe Cullet, Lovleen Bhullar, Sujith Koonan, 2024-07-12 Environmental law is a broad discipline covering issues such as nature conservation the prevention or abatement of pollution and waste management It also encompasses concerns related to natural resources such as forests minerals and fisheries and the balance between their use and conservation India has been at the forefront of jurisprudential developments among countries with similar environmental geographical socio economic and cultural conditions Concurrently the country has been receptive to ideas and principles arising from other parts of the world or from international law The growth of environmental and natural resources law in India has been sustained in equal measure by growing environmental awareness and the increasingly dire nature of the problems associated with the environment and natural resources ranging from local issues to the global climate crisis At the same time the continuous push for development has not abated leading to recurrent pressure to weaken existing standards for environmental protection and the management and use of natural resources The Oxford

Handbook of Environmental and Natural Resources Law in India offers the most comprehensive coverage of the diverse and complex discipline of environmental and natural resources law in India over the past fifty years. With forty-two contributions from law and non-law scholars, the Handbook presents diverse perspectives on several areas including biodiversity, climate change, water, forests, agriculture, health, resource extraction, and industrial development. By departing from the existing approach that examines natural resources law and environmental law separately, The Oxford Handbook of Environmental and Natural Resources Law in India offers a much-needed integrated analysis of the development of domestic jurisprudence vis-à-vis the environment and natural resources. Weather, Climate, and the Geographical Imagination Martin Mahony, Samuel Randalls, 2020-03-24 As global temperatures rise under the forcing hand of humanity's greenhouse gas emissions, new questions are being asked of how societies make sense of their weather, of the cultural values which are afforded to climate, and of how environmental futures are imagined, feared, predicted, and remade. *Weather, Climate, and Geographical Imagination* contributes to this conversation by bringing together a range of voices from history of science, historical geography, and environmental history, each speaking to a set of questions about the role of space and place in the production, circulation, reception, and application of knowledges about weather and climate. The volume develops the concept of geographical imagination to address the intersecting forces of scientific knowledge, cultural politics, bodily experience, and spatial imaginaries which shape the history of knowledges about climate. **Following the Proceeds of Environmental Crime**

Gregory Rose, 2014-06-27 Huge quantities of natural resources are illegally harvested and their proceeds laundered in the Asia-Pacific region, fostering corruption and undermining environmental governance. Most illegal exploitation and pollution occurs in countries with poor governance capacities, but much of the sale for profit and money laundering occurs in mature markets with well-developed governance capacities. Their asymmetrical enforcement capacities can complement each other. This book explores ways to combat illegal fishing and logging in the Asia-Pacific region by the use of cooperative legal measures, particularly anti-money laundering and confiscation of proceeds techniques. Contributors to this volume cover themes including the nature of transnational environmental crime, patterns in laundering of illicit fish and forest products, networks for distribution of illicit products, weaknesses in current systems for assurance of the legality of products, and international legal cooperation to enforce anti-money laundering laws in relation to illicit products. In considering these topics, the book explores how the innovative use of anti-money laundering measures and the seizure of criminal proceeds can, as policy options, combat transnational fishery and forestry crimes. The book will be of keen interest to scholars and students of environmental law and criminal law, and excellent use for practitioners in natural resources conservation law. *Sustainable Fishery Systems* Anthony Charles, 2023-06-20 **SUSTAINABLE FISHERY SYSTEMS** An up-to-date and interdisciplinary guide to sustainable fisheries. Fisheries, whether small-scale or large-scale, are filled with complexity and uncertainty. Making the

right decisions to successfully manage fisheries for sustainability and resilience requires a systems approach including both natural and human elements and their many interactions To understand fisheries and how they change over time a diverse range of fishery knowledge must be brought together Sustainable Fishery Systems 2nd edition meets these needs The new edition provides essential information that can be readily applied within government community industrial academic and research settings Sustainable Fishery Systems 2nd edition retains the first edition s emphasis on themes such as sustainability resilience uncertainty complexity and conflict and expands its treatment of topics that have since the first edition s publication become crucial to consider in the field of fisheries As a result readers will find Updated and expanded coverage of topics including coastal conservation ecosystem based management co management community based management and more New chapters covering connections between fisheries and marine protected areas biodiversity conservation climate and fisheries and multi sectoral management A more detailed introduction to the systems perspective of fisheries reflecting the substantial growth in that subject s importance and covering in detail the natural human and governance aspects of fisheries Sustainable Fishery Systems 2nd edition is an indispensable interdisciplinary resource for educators researchers government agencies and fisheries managers

A study of shark and ray non-fin commodities in Indonesia Muttaqin, E.,Simeon, B.,Dharmadi, M.I.,Prasetyo, A.P.,Booth, H.,Yulianto, I.,2024-07-16 The work presented here summarizes published research from Indonesia also linked to an FAO summary plus studies from India Indonesia and Peru In collaboration with various country programmes and local research groups the Food and Agriculture Organization of the United Nations FAO examined shark and ray value chains The goal was to provide valuable information for fisheries and environmental agencies shedding light on the role of non fin commodities derived from sharks and rays in fisheries and trade To effectively conserve shark and ray resources we must adopt a more holistic understanding of their fisheries and markets Historically the focus has primarily centred on regulating the export of shark fins often overlooking traditional and emerging fishing practices and markets related to other elasmobranch products such as meat skin cartilage liver oil and gill plates Due to limited examination of non fin commodities we lack clarity on their sources the extent of exploitation and their significance as drivers of elasmobranch utilization This report aims to shift attention towards non fin commodities in shark and ray management By doing so we hope to expand the range of potential interventions that can be employed to achieve sustainable elasmobranch fisheries a critical source of food security nutrition and livelihoods for coastal communities worldwide
