*The Anatomy of Manual Dexterity* Ian Darian-Smith, Mary P. Galea, Corinna Darian-Smith, Michio Sugitani, Andrew Tan, Kathleen Burman, 2012-12-06 1 1 Purpose and Plan of This Review This review is focused on the topography and connections of some of the neuron populations that determine the manual dexterity of the macaque monkey The populations selected for examination are the following 1 The corticospinal neuron populations 2 The thalamocortical and corticothalamic neuron populations associated with the sensorimotor cortex 3 The ipsilateral cortical connections of the sensorimotor cortex These neuron populations have been chosen because of their obvious relevance to the directed intelligent use of the hands but also because of their anatomical and functional interdependence Corticospinal neuron populations transmit a complex orchestrated output from a number of different regions of cerebral cortex to the neuron populations in every segment of the spinal cord and this output includes the command information defining the intended manual action The thalamocortical complex is especially concerned with the transmission and modulation or filtering of a visual tactile proprioceptive vestibular and auditory information to the cerebral cortex and information from the cerebellum basal ganglia limbic system and brain stem which is relevant to sensorimotor behavior Finally the extensive ipsilateral cortical connections constitute a major part of the supraspinal circuitry which coordinates the contributions of all the cortical neuron populations contributing to intelligent sensorimotor behavior and in particular transmits the cross talk between those cortical neuron populations which shape and control the dextrous handling of objects within reach

helpful in applying a Texas Rule When appropriate practical pointers are also provided on how to use the Rule Where the Rules apply in the same fashion for both civil and criminal cases those points are discussed together On the other hand where they diverge the authors have used separate headings for Civil and Criminal when that seems appropriate One of the objectives of the Editorial Analysis in this text is to deal with the interrelationships of the various Rules The authors have noted those areas where the Rules differ from pre Rules case law or statutory provisions Some of the Rules changed the prior Texas evidence law and although many of the Texas Rules agree with the Federal Rules a number differ significantly
