Global Perspectives on Global History Dominic Sachsenmaier,2011-08-04 In recent years historians across the world have become increasingly interested in transnational and global approaches to the past However the debates surrounding this new border crossing movement have remained limited in scope as theoretical exchanges on the tasks responsibilities and potentials of global history have been largely confined to national or regional academic communities In this groundbreaking book Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows sociologies of knowledge and hierarchies that are an intrinsic part of historical practice Taking the United States Germany and China as his main case studies he reflects upon the character of different approaches to global history as well as their social political and cultural contexts He argues that this new global trend in historiography needs to be supported by a corresponding increase in transnational dialogue cooperation and exchange

Ethics and Justice. Éthique et justice Peter Kemp,Noriko Hashimoto,2017 The main theme of volume 6

of Eco ethica is Ethics and Justice which focuses on the idea of justice in a metaphysical social and personal sense Justice is considered as a balance between opposite ambitions in interdependent persons and as equity in legislation but not as blind justice Today it is valuable not only on the national but also on the cosmopolitan level Before it became personal justice the idea of justice was considered metaphysical and social both in European and Chinese culture However in modern times it is often reduced to a moral duty without meta ethical responsibility The last section considers the importance of the philosophy of Paul Ricoeur 1913 2005 for clarifying the idea of justice Series Eco Ethica Vol 6 Subject Philosophy Ethics **Body Counts** Fondation Marcel Mérielux, 2005 How quantification arrived at its current dominant position in health care

Routledge Handbook of Global Economic History Francesco Boldizzoni, Pat Hudson, 2015-12-22 The Routledge Handbook of Global Economic History documents and interprets the development of economic history as a global discipline from the later nineteenth century to the present day Exploring the normative and relativistic nature of different schools and traditions of thought this handbook not only examines current paradigmatic western approaches but also those conceived in less open societies and in varied economic political and cultural contexts In doing so this book clears the way for greater critical understanding and a more genuinely global approach to economic history This handbook brings together leading international contributors in order to systematically address cultural and intellectual traditions around the globe Many of these are exposed for consideration for the first time in English The chapters explore dominant ideas and historiographical trends and open them up to critical transnational perspectives This volume is essential reading for both academics and students in economic and social history As this field of study is very much a bridge between the social sciences and humanities the issues examined in the book will also have relevance for those seeking to understand the evolution of other academic disciplines under the pressures of varied economic political and cultural circumstances on both national and global scales *Social Regionalism in the Global Economy* Adelle Blackett, Christian Lévesque, 2010-12-20 Regional trade agreements have expanded exponentially over the past decade and have become a significant if controversial factor in the expanse of economic globalization Social Regionalism in the Global Economy attempts to take a fresh interdisciplinary approach to addressing labour regulation by drawing upon insights from industrial relations comparative capitalism and new governance schools of thought It stands for the proposition that an interdisciplinary study of regional regulation holds the potential to offer a fuller account of social regionalism Its focus is to consider how institutions and labour market actors reconstruct and renegotiate regulatory space in a changing economic environment characterized by regional impulses It argues that there is a dynamic interplay between institutions and actors of social regulation This interplay occurs at many levels The book therefore maps both how actors shape institutions as well as how institutions shape social actors ability to affect regulatory processes The editors bring together leading international specialists willing to move beyond textual analyses of regional agreements to offer alternative accounts of regional integration The work emphasizes that institutional

context and social actors at multiple governance levels are integral to the progressive construction and regulation of regional space It further contributes to the literature by combining insights from overlooked regional entities in transition and developing countries with original analyses from the European Union and the NAFTA These aims will be achieved by combining original research that is empirically grounded with theoretically informed analysis **La composition écrite**
