commercial supérieur par rapport aux filières intermédiaires et techniques celles même qui mènent aux métiers du bureau, du secrétariat comptable et du commerce de vente. Pourtant ces filières ont formé une voie majeure de prolongation des études post primaires empruntée en majorité par les filles et ont accompagné les mutations du marché du travail tertiaire. En s'appuyant sur les recherches disponibles ce numéro d'Histoire de l'éducation propose de nouvelles pistes de réflexion qui toutes clarifient de manière prioritaire la place des filles au sein de l'enseignement commercial en comparaison avec celle des garçons. L'approche de genre s'avère alors fort utile pour penser les processus d'institutionnalisation des formations tout comme leurs liens avec le marché du travail qualifié. Le cas français sera utilement éclairé par des comparaisons avec les débuts de l'enseignement commercial féminin en Angleterre et en Allemagne. *La marque Expert-Comptable au service de l'économie* Béatrice Touchelay, Ordre des experts-comptables (France).
