L'entreprise Dans La Mondialisation Contexte Et Dynamiques D'investissement Et D'innovation:

L'entreprise dans la mondialisation : contexte et dynamiques d'investissement et d'innovation Dimitri Uzundis, Blandine Laperche, Sophie Boutillier, 2011-01-19 La mondialisation n'est pas un phénomène nouveau. L'histoire nous enseigne que le commerce a depuis longtemps unifié le monde. Mais au fil du développement des affaires, les entreprises se sont construites à partir des investissements transfrontaliers et dans un but d'innover continuellement. Les grandes entreprises nient les frontières tout en tirant profit des particularismes nationaux pour mieux asseoir leur pouvoir de contrôle des marchés mondiaux. Comment comprendre la mondialisation ? De quelle manière la mondialisation est-elle intimement liée aux stratégies globales des firmes et comment ces stratégies globales sont-elles le résultat de la mondialisation ? Face aux contraintes de la mondialisation des marchés et de la concurrence que font les entreprises pour survivre ou se développer ? Les auteurs de ce livre analysent la mondialisation et les stratégies des firmes dans un contexte hautement concurrentiel soumis aux impératifs de la finance et du profit immédiat.

L'entreprise dans la mondialisation, *Innovation in Developing and Transition Countries* Alexandra Tsvetkova, Jana Schmutzler, Marcela Suarez, Alessandra Faggian, 2017-09-29 This edited volume offers a multidisciplinary perspective on innovation challenges and innovative practices in the context of developing and transition countries. The contributions mostly embrace a national innovation system approach in an attempt to understand innovation processes and their implications at both macro and micro levels.

Innovation, Catch-up and Sustainable Development Andreas Pyka, Keun Lee, 2021-11-16 This volume presents selected contributions from the 2018 conference of the International Schumpeter Society (ISS). The selected chapters in this volume reflect the state of the art of Schumpeterian economics dedicated to the three conference topics: innovation, catch up, and sustainability. Innovation is driving catch up processes and is the condition for a transformation towards higher degrees of sustainability. Therefore, Schumpeterian economics has to play a key role in these most challenging fields of human societies' development in the 21st century. The three topics are well suited to capture the great variety of issues which have the potential to shape the scientific discussion in economics and related disciplines in the years to come. The presented contributions show the broadness and high standard of Schumpeterian analysis. The ideas of dynamics, heterogeneity, novelty, and innovation, as well as transformation, are the most attractive fields in economics today and offer the most prolific interdisciplinary connections now and for the years to come when humankind, our global society, has to master the transition towards sustainable economic systems by solving the grand challenges and wicked problems with which we are confronted today. Therefore, the book is a must-read for scholars, researchers, and students interested in a better understanding of innovation, catch up, and sustainability and Schumpeterian economics in general. The chapter 'Industrial life cycle relevance of national markets in the development of new industries for energy technologies: the case of wind energy' is available open access under a CC BY 4.0 License via link.springer.com.

Mondialisation et résilience des territoires Abdelillah Hamdouch, 2012 La mondialisation

par le perpétuel mouvement qu'elle déploie fait basculer de nombreux territoires dans un équilibre instable. Face à cette déferlante des pays des régions des villes des zones rurales voient leurs valeurs et leur identité s'éroder et leurs sources internes de développement économique social politique et culturel brutalement soumises des éléments dont ils n'ont plus tout fait la maîtrise. Ces menaces et contraintes sont réelles et de nombreux territoires subissent aujourd'hui de plein fouet les effets déstructurants et parfois irréversibles de la mondialisation. Cependant l'expérience montre que certains territoires s'en sortent mieux que d'autres en résistant en s'adaptant voire en se réinventant par rapport à la mondialisation. C'est en regard de ces exemples que la notion de résilience territoriale prend tout son sens. Pour un territoire résilient consiste non seulement à gérer en son sein des capacités de résistance et d'adaptation lui permettant de maintenir ou de retrouver les bases de son développement et de sa spécificité la suite de chocs plus ou moins brutaux résilience statique mais également à inventer et à puiser de nouvelles ressources et capacités lui permettant de s'insérer favorablement dans la dynamique de transformation impulsée par l'évolution rapide de l'environnement socio-économique résilience dynamique. Par la démonstration du caractère multiforme et accidenté des trajectoires de résilience de différents territoires les auteurs de cet ouvrage apportent un éclairage analytique et empirique approfondi des contraintes et perspectives d'adaptation dans le nouveau contexte complexe global.

Mondialisation et dynamiques de la production urbaine Natacha Aveline-Dubach, 2024-01-16 Au cours des vingt dernières années les processus d'urbanisation ont subi de profondes transformations sous l'influence croissante d'acteurs privés tout particulièrement financiers exposant le cadre physique des villes aux flux de capitaux mondiaux. Cela a généré une hausse généralisée des valeurs immobilières à l'échelle planétaire le plus souvent à l'écarter des capacités financières des acteurs locaux en premier lieu les ménages qui creuse les inégalités et accroît la vulnérabilité des sociétés aux risques financiers et environnementaux. Mondialisation et dynamiques de la production urbaine offre des clés de lecture pour appréhender ces dynamiques d'accumulation du capital dans le cadre bâti des villes en tenant compte de la diversité de leurs configurations de leur intensité et de leurs effets urbains selon les contextes nationaux. Au-delà du cas des grands pays occidentaux foyers initiaux de l'industrie financière et des théorisations sur l'urbain cet ouvrage aborde les contextes particuliers de la production immobilière dans quatre grandes régions Asie du Nord-Est Asie du Sud-Est Moyen-Orient et Afrique de l'Ouest.
