Manual Uno Mille 91:

Manual de cuidados paliativos en geriatría Carlos Sandoval, 2024-02-28 Los cuidados paliativos surgen como una nueva disciplina de la medicina para tratar una serie de enfermedades terminales con el fin de darle al paciente una mejor calidad de vida en sus últimos momentos. Se trata sobre todo de brindarle alivio, tranquilidad espiritual y finalmente una muerte digna. A pesar de la suma importancia en su estudio y aplicación, lamentablemente aún no se enseña masivamente en las facultades de Medicina. Ante la necesidad de más y mejor información sobre esta materia surge esta publicación que pretende ser un texto donde se plasman los conocimientos y experiencias de diversos profesionales que a diario tratan a personas adultas mayores que atraviesan estos procesos de enfermedades terminales. En ese sentido, este libro desde un enfoque geriatrico abarca no solo los aspectos médicos de los cuidados paliativos sino también los psicológicos, nutricionales, sociales, terapéuticos y espirituales, así como incide en el importante rol de la familia o grupo familiar que acompaña a estos adultos mayores en situación de enfermedad terminal. De este modo, brinda información clave que contribuye a aliviar el sufrimiento grave en este tipo de pacientes. Es así que este manual está dirigido a todos los profesionales que se desempeñan en este campo médico, así como también a aquellas personas que conviven con un paciente adulto mayor que se encuentre en esta condición de salud.
