5 Steps for Washing Dishes in a Three-Compartment Sink

All steps must be followed in the correct order for the cleaning and sanitizing tasks:

2

Wash dishes

Use warm, soapy water (43°C / 110°F) and a suitable brush to remove oil and other remaining stains on the dishes and utensils.

4

Soak in sanitizer

Collect and soak all rinsed dishes in your chosen sanitizer. Follow the instructions under the label of your sanitizer regarding the correct concentration and contact time.*

*Alternatively, use very hot water with a temperature of at least 70°C / 158°F as the sanitizer and soak dishes for a minimum of 90 seconds.

1

Scrape food

Manually remove and collect all remaining food debris.

3

Rinse the dishes

Thoroughly rinse the dishes with warm water to remove the remaining detergent.

5

Air-dry

Stack all sanitized dishes in a dedicated rack and allow them to air-dry naturally.*

*Do not use any kind of towel to dry the sanitized dishes, as this can cause cross-contamination.

López Camelo,Food and Agriculture Organization of the United Nations,2004-01-01 The fruit and vegetable production sector of Latin America and the Caribbean Asia and Eastern Europe is facing a new situation where on the one hand supermarket chains account for an increasing percentage of the domestic food retail market and on the other hand producers must compete in an increasingly demanding global market for non traditional and off season fruits and vegetables Small farmers are increasingly being marginalized and will be facing unequal market conditions unless they are able to change their practices to meet the needs of a modern food marketing system Regardless of

the production system the technological challenge is to increase returns through the rational use of available resources reducing production costs and post harvest losses enhancing competitiveness and adding value to the final product

Handbook of Food Science, Technology, and Engineering Yiu H. Hui, 2006 *Managing Food Safety and Hygiene* Bridget M. Hutter, 2011-01-01 One of the most thorough and considered studies we have of the relationship between regulation and business risk management practices Food regulation provides a revealing canvas for understanding the dynamics of the governance of risk John Braithwaite Australian National University Food safety and hygiene is of critical importance to us all yet as periodic food crises in various countries each year show we are all dependent on others in business and public regulation to ensure that the food we consume from food in the retailing and hospitality sectors is safe Bridget Hutter considers the understandings of risk and regulation held by those in business and considers the compliance pressures on managers and owners and how these relate to understandings of risk and uncertainty Using data from an in depth case study of the food retail and catering sectors in the UK the research investigates how business risk management practices are influenced by external pressures such as state regulation consumers insurance and the media and by pressures within business The argument of the book is that food businesses in the UK are generally motivated to manage risk They realize that good risk management aligns with good business practice However there are challenges for an industry that is highly segmented in terms of risk management capacity The findings have implications for contemporary risk regulation in the increasingly number of countries that rely on self regulation *Managing Food Safety and Hygiene* will prove invaluable for academic researchers and students in risk regulation studies business studies food studies organizational studies social psychology socio legal studies sociology management public administration and political science In addition the book will also appeal to practitioners specifically to senior policy makers regulators and business risk managers charged with managing risk in diverse organizational settings and across different functional jurisdictions Basic Food Plant Sanitation Manual ,1979 Abstract A reference text provides basic information and guidelines for food plant sanitation operators and managers concerning communication and management skills regulations and compliance quality control measures food contamination sources test methods and sanitation and hygiene practices Specific attention is given to communication skills and pitfalls good manufacturing practices in the manufacturing processing packing and holding of human foods defect action levels practical aspects of sanitation in plant inspections control of insects flies mites pesticides proposed rules and the morphology of yeasts molds and bacteria Aspects of fumigation heat sterilization bactericides personal hygiene and cleaning practices also are discussed wz Handbook of Food Science, Technology, and Engineering - 4 Volume Set Y. H. Hui, Frank Sherkat, 2005-12-19 Advances in food science technology and engineering are occurring at such a rapid rate that obtaining current detailed information is challenging at best While almost everyone engaged in these disciplines has accumulated a vast variety of data over time an organized comprehensive resource containing this data would be invaluable to have The
