**Educating for Advanced Foreign Language Capacities** Heidi Byrnes, Heather D. Weger, Katherine A.

Sprang, 2006-10-06 Advanced language learning has only recently begun to capture the interest and attention of applied linguists and professionals in language education in the United States. In this breakthrough volume, experts in the field lay the groundwork for approaching the increasingly important role of advanced language learning in the larger context of multilingual societies, globalization, and security. This volume presents both general and theoretical insights and language-specific considerations in college classrooms spanning a range of languages from the commonly taught languages of English, French, and German to the less commonly taught Farsi, Korean, Norwegian, and Russian. Among theoretical frameworks likely to be conducive to imagining and fostering instructed advancedness in a second language, this volume highlights a cognitive semantic approach. The theoretical and data-based findings make clear that advanced learners in particular are characterized by the capacity to make situated choices from across the entire language system, from vocabulary and grammar to discourse features, which suggests the need for a text-oriented, meaning-driven approach to language teaching, learning, and research. This volume also considers whether and how information structuring in second language composition reveals first language preferences of grammaticized concepts. Other topics include curricular and instructional approaches to narrativity, vocabulary expansion, the demands on instructed programs for efficiency and effectiveness in order to assure advanced levels and learners' ability to function in professional contexts with their diverse oral and written genre requirements. Finally, the volume probes the role and nature of assessment as a measurement tool for both researching and assessing advanced language learning and as an essential component of improving programs. **Focus on Vocabulary Learning** Marlise

Horst, 2019-02-14 **Focus on Vocabulary Learning** explores teaching vocabulary to second and foreign language learners aged 5-18. It describes the considerable challenges of learning the vocabulary of a new language from a range of perspectives and aims to equip teachers with practical solutions to meet these challenges. This book provides corpus-informed insights into teaching the vocabulary that is most useful to learners and examines classroom-based research to identify effective learning strategies. A rich variety of practical activities and examples from real classrooms link theory to practice. **Focus on Vocabulary Learning** provides valuable guidance on a wide range of topics related to vocabulary teaching and learning in school contexts. The connections between current research findings and useful classroom strategies are very helpful. This engaging and accessible book should become an excellent resource for teachers.
