Improve the Brain

and its Power Hseham Ttud,2023-12-06 Our brain is 1400 times more complicated as compared to the entire world's telephone system and so is it more able and capable compared to the world's best computer yet many times we still cannot remember our postal code Wake up your brain and let your natural processes work freely without any obstacles The brain is the most important part of our body The functioning of all the parts of our body is done through our brain only It is only the brain that governs every action of our body If we have any pain in our body then it is our brain that motivates us to cure the pain As a result we try to lovingly massage our painful area with our hands this action also trains our brain to think and act in this manner If the brain were removed from our bodies then the bodies would become like lifeless puppets Some people may have sharp brains and some may have weak brains People who have completely weak brains unstable brains and or impaired brains usually have to undergo mental treatment or even have to be admitted to asylums for constant treatment Do you know that The blood vessels that are spread in our brains have an average length of around one lakh miles If the blood circulation stops in the brain then within ten seconds a person loses consciousness The grey matter of the brain is made up of neurons which alert and comprehend by sending signals to the brain The thickness of the neuron is 4 microns On the tip of a needle you can fit 30 000 neurons In a human brain there are around 100 billion neurons i.e. as many stars as are available in the sky At the time of birth itself emotions like happiness sorrow fear shyness kindness etc are also born in the brain of a human Then these emotions take the form of how the child is brought up Laughing at a joke is not an easy task as for this task five different parts of the brain have to do the same job The brain is one magical part that scientists have not yet been able to thoroughly understand To understand the brain all the world's scientists are trying their best to understand it The amount of knowledge a scientist comes to know about the brain makes him more curious to know more Thus the process of research keeps on continuing further with no end This book focuses on this important part of our body Unretired: Unlocking Your Potential in the Golden Years Joseph Libatique, The Stellar Enigma: Unveiling the Existence of Extraterrestrial Life Pasquale De Marco,2025-05-20 Immerse yourself in the captivating realm of extraterrestrial life as we embark on a journey of discovery in this groundbreaking book Prepare to have your mind expanded as we delve into the mysteries of the cosmos and explore the tantalizing possibilities of alien existence With meticulous research and thought provoking insights this book presents a comprehensive examination of the evidence suggesting that we are not alone in the universe From compelling UFO sightings and intriguing alien encounters to the latest scientific findings and mind bending theories we unveil a world of wonder that will leave you questioning everything you thought you knew Through captivating narratives and expert analysis we take you on an exhilarating ride through the annals of history uncovering ancient civilizations celestial observations medieval tales of extraordinary encounters and modern day reports of extraterrestrial phenomena We examine the scientific evidence including perplexing signals from deep space enigmatic patterns in crop circles and the ongoing search for life beyond Earth But this book goes beyond mere speculation It delves into the profound implications of alien life exploring the

philosophical ethical and existential questions that arise from the possibility of our cosmic companionship What would it mean for our understanding of the universe our place within it and the origins of life itself Prepare to be challenged inspired and humbled as you embark on this extraordinary journey This book is not just a collection of facts and theories it is an invitation to ponder the vastness of the universe the mysteries that surround us and the exhilarating possibility that we are not alone Open your mind and join us in this exploration of the stellar enigma If you like this book write a review on google books
