Shaw, 2001 This volume presents an in depth study of the Late Minoan IA cross draft kiln found in excavations at Kommos Crete The kiln

is of a type popular during the Neopalatial period and its good state of preservation has allowed the authors to speculate about its original internal layout and use as well as about the roof that covered it. Much of the large quantity of pottery found associated with the kiln is analyzed in detail allowing for the first time the study of the shapes, decoration and technical characteristics of vases known to have been fired in a specific LM IA kiln. The book presents an integrated program of analytical techniques used to illustrate the range of firing temperatures, the compositional similarities and differences in the clays used and aspects of the firing process and the upper kiln structure. Offered here is a valuable contribution to our knowledge of the technology and organization of ceramic production at the beginning of the Late Minoan period which will form a basis for studies of pottery provenience and exchange.

The Clay-worker, 1928 *Wood-fired Ceramics* Coll Minogue, Robert Sanderson, 2000-03-08 This book describes the development of the main types of wood fired kilns used by today's potters.

Ceramics and the Spanish Conquest Gilda Hernández Sánchez, 2011-11-25 Focusing on the native ceramic technology of central Mexico during the early colonial period and the present day, this book offers a refreshing view into the process of cultural continuity and change in the indigenous Mesoamerican world after the Spanish conquest.

Ceramic Industry, 1927 Chemical & Metallurgical Engineering, 1920 **Technology in Crisis** Ilaria Caloi, Charlotte Langohr, 2019-02-08 This workshop questioned the reliability of pottery as crisis indicator within the archaeological data set. More particularly following the perspective of archaeological and anthropological research that assesses pottery technology as a social product, there is an interest in addressing the social and cultural aspects of technological change.

Society Conference on Energy Management William J. Smothers, 2009-09-28 This volume is part of the Ceramic Engineering and Science Proceeding CESP series. This series contains a collection of papers dealing with issues in both traditional ceramics (e.g. glass, whitewares, refractories and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramics include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics and more.
