Irvine, 2007-11-30 Instructors at all levels are being encouraged to teach writing in their courses even in subjects other than English Because the novel reflects a broad set of human experiences and history it is the ideal vehicle for learning about a wide range of issues This book helps educators learn how to incorporate novels in courses in English the humanities social and behavioral sciences and professional studies The chapters focus on using the novel to explore ethical concerns multiculturalism history social theory psychology social work and education The book looks at major canonical works as well as graphic novels and popular literature Language arts are at the forefront of education these days Instructors at all levels are being encouraged to teach writing in their courses even if those courses cover subjects

other than English Literature instructors have long used fiction to teach composition But because the novel reflects a broad range of human experiences and historical events it is the ideal medium for learning about contemporary social issues This book helps educators learn how to use the novel in courses in English the humanities social and behavioral sciences and professional studies The book is divided into broad sections on general education classes multiculturalism literature classes humanities courses classes in social behavioral and political sciences and professional studies such as social work and teacher training Each section includes chapters written by gifted teachers and provides a wealth of theoretical and practical information While the book examines major canonical works such as *Hard Times* *Billy Budd* and *Invisible Man* it also looks at graphic novels science fiction and popular contemporary works such as *Finishing School* and *Jarhead* Chapters reflect the personal successes of their authors and cite works for further reading

Handbook of Literacy and Technology David Reinking, Michael C. McKenna, Linda D. Labbo, Ronald D. Kieffer, 1998-04-01 The major shift going on today in the technologies of reading and writing raises important questions about conventional conceptions of literacy and its role in education society and culture What are the important characteristics of electronic forms of reading and writing distinguishing them from printed forms To what extent and in what ways is literacy being transformed by new technologies This central question is addressed in this volume from diverse multidisciplinary perspectives The contributing authors focus on a guiding question in one of the following areas which correspond to the major sections of the book

Transforming Texts What are the new differences between printed and electronic texts and what are the implications of new textual forms for defining literacy especially in regard to teaching and learning in schools

Transforming Readers and Writers How do electronic reading and writing change conceptualizations of literacy development from childhood through adulthood

Transforming Classrooms and Schools What are the effects of introducing new reading and writing technologies into schools and classrooms

Transforming Instruction How can instruction be adapted in response to the changing literacy landscape and how can teachers and students exploit forms of reading and writing to enhance teaching and learning

Transforming Society What are the broad societal implications of the increasing prevalence of electronic forms of reading and writing

Transforming Literacy Research What are the questions that must be addressed as digital reading and writing become more common and what approaches to research will be most useful in addressing those questions

This volume is the result of an interactive process The contributors met as a group to discuss drafts of their chapters at a one day meeting convened and sponsored by the National Reading Research Center and had read each others chapters prior to this gathering That meeting was followed by a two day conference attended by approximately 180 researchers educators and policymakers who responded to an open invitation to present papers and to attend sessions focusing on the six major themes of the book Contributors then revised their chapters based on interactions with fellow contributors conference participants and volume editors Thus this work is more than just a compilation of the individual authors views Rather it represents a synthesis of a

broad range of current thinking about how literacy is being and may be transformed by technology *Talking, Drawing, Writing* Martha Horn, Mary Ellen Giacobbe, 2007 The book's lessons are organized by topic and include oral storytelling drawing writing words assessment introducing booklets and moving writers forward Based on the authors work in urban kindergarten and first grade classes the essence and structure of many of the lessons lend themselves to adaptation through fifth grade Jacket *The Literacy of Play and Innovation* Christiane Wood, 2019-01-15 The Literacy of Play and Innovation provides a portrait of what innovative education looks like from a literacy perspective Through an in depth case study of a maker school's innovative design in particular of four early childhood educator's classrooms this book demonstrates that children's inspiration curiosity and creativity is a direct result of the school environment Presenting a unique data driven model of literacy play and innovation taking the maker movement beyond STEM education this book helps readers understand literacy learning through making and the creative approaches embedded in early literacy classroom practices
