Important Shelf Life Information

Plug the GSM into a wall outlet immediately upon receipt. An internal battery retains factory programming. This internal battery has a shelf life of approximately six months from the factory start-up date. The label affixed to the GSM housing records the factory start-up date. The battery is not rechargeable.

CAUTION

If the internal battery discharges fully, the GSM will no longer be usable. For this reason, once you install the GSM, do not shut off the AC power to the GSM. Reserve the internal battery power for power failure backup.

Product Overview

The GSM is a security device that encrypts (encodes) the data entered at the Card Reader In Dispenser (CRIND®) device or PIN pad during a debit sale, for transmission from the site controller to the debit card network host. The site controller may be a C-2 G-SITE® Point Of Sale (POS) system, PC-based G-SITE POS system, Passport® POS system, or a third-party controller.

The GSM is powered by a separate power supply, and is cabled to the site controller through an RS-232C Port labeled “To Controller”. A status Light Emitting Diode (LED) or light displays the GSM’s current state.
