Video as Method Anne M. Harris, 2016-01-21 Perhaps the greatest strength of choosing video as a method for social research is its flexible and almost limitless potential for gathering analyzing writing up and disseminating the research findings Understanding the rich potential of video as both method and methodology is a process inextricably linked to epistemological study design analysis and dissemination choices As technology and media have evolved video has become a primary tool of presenting information and ideas and a means of culture making Video as Method provides researchers with a guide to understanding designing conducting and disseminating video based research and the rapid proliferation of approaches uses and designs now available In the face of large data sets and the great range of types and uses of video as an effective research tool many researchers struggle to know how best to represent both video based methodologies and research findings Anne Harris provides in depth examples in each chapter and guides readers step by step through the chapter topics in a methodical fashion that mirrors the research journey

Gopro Karma Drone: Learning the Basics Michael Galleso, 2016-10-20 The GoPro Karma Drone is the first foldable drone The announcement was made in December of 2015 but the long awaited GoPro is not yet up for purchase until October of this year It is lightweight and easy to use when compared to other drones currently on the market It is a professional grade drone that can be used by anyone and comes with its own backpack In addition the GoPro Karma drone requires no assembly simply remove from the backpack unfold the propeller and you are ready to use The parts can be easily replaced if damaged and the GoPro Karma is able to stand up to everyday wear and tear

Conservation Drones Serge A. Wich, Lian Pin Koh, 2018-05-31 Increasing numbers of ecologists and conservation biologists have begun to explore the use of drone technology to obtain accurate and up to date data on the distribution and density of species as well as the threats to their habitats in their ongoing attempts to conserve and monitor biodiversity Conservation drones are low cost autonomous and operator friendly unmanned aerial vehicles that can be used for surveying mapping and monitoring both habitat and biodiversity They are fast becoming a valuable complement to ground based surveys and satellite imagery for a wide range of ecological and conservation applications The authors pioneered the use of conservation drones for the purpose of monitoring orangutan populations in Southeast Asia They subsequently founded ConservationDrones.org to share their knowledge of building and using drones with colleagues in the wider environmental community This website has proved highly popular and this book aims to further build capacity to use drones and inspire others to adapt emerging technologies for practical conservation
