### Civic Whistle Noise From HVAC With A/C On - 4 Door Model Added

#### Symptom

Customer complaint of a whistle noise from HVAC system with the A/C ON, between 2,000- 2,700 RPM.

#### Cause

The whistling noise is caused in the suction hose chamber. The refrigerant pulsates from the A/C compressor back to the intake chamber of the suction hose. Due to the chamber size, the pulsation resonance is then amplified into the cabin.

#### Countermeasure

The intake chamber dimension of the suction hose has been changed. This change reduces any pulsation resonance into the chamber, and will cancel out any noise.

Part identification below:

Old Suction hose

SHHFK77\*\*J0006340  
SHHFK78\*\*J0500190

HTR 4 Door application to production will be at the beginning of 19YM in August 2019.

VIN cut off to be confirmed at a later date.

#### Market Treatment

Replace on customer complaint.

#### Repair Method

1. Connect an A/C recovery system to the high pressure service port (A) and low pressure service port (B) as shown. Follow the equipment manufacturers instructions to recover the refrigerant.
