*Mahāyāna texts translated into Western languages* Peter Pfandt, 2024-06-03      **Logos of Phenomenology and Phenomenology of the Logos. Book One** Anna-Teresa Tymieniecka, 2006-06-30 During its century long unfolding spreading in numerous directions Husserlian phenomenology while loosening inner articulations has nevertheless maintained a somewhat consistent profile As we see in this collection the numerous conceptions and theories advanced in the various phases of reinterpretations have remained identifiable with phenomenology What conveys this consistency in virtue of which innumerable types of inquiry scientific social artistic literary may consider themselves phenomenological Is it not the quintessence of the phenomenological quest namely our seeking to reach the very foundations of reality at all its constitutive levels by pursuing its logos Inquiring into the logos of the phenomenological quest we discover indeed all the main constitutive spheres of reality and of the human subject involved in it and concurrently the logos itself comes to light in the radiation of its force Tymieniecka      **The New Scholasticism** Edward Aloysius Pace, James Hugh Ryan, 1927 Includes section Book Reviews      **Meditation Techniques of the Buddhist and Taoist Masters** Daniel Odier, 2003-01-28 Odier guides the reader through the specifics of the mental disciplines and visualizations that Buddhist and Taoist masters have used for ages in their quest for illumination To devote oneself to meditation in the sense understood by Buddhists and Taoists is to realize the understanding of how every fiber of our being converges with all creation      Multicultural Writers from Antiquity to 1945 Alba Amoia, Bettina L. Knapp, 2001-10-30 The final decades of the 20th century have seen an explosion of interest in multiculturalism But multiculturalism is more than an awareness of the different cultures comprising contemporary societies For centuries people from around the world have come in contact with cultures other than their own and their exposure to multiple cultures has fostered their creativity and ability to make lasting contributions to civilization The effects of multiculturalism are especially apparent in literature since writers tend to be particularly aware of their environments and record their experiences This reference includes alphabetically arranged entries for more than 100 world writers from antiquity to 1945 who were significantly influenced by cultures other than their own Included are entries for major canonical Ancient and Modern writers of the Western and Eastern worlds Each entry is written by an expert contributor and includes a brief biography a discussion of multicultural themes and contexts a summary of the writer's critical reception and primary and secondary bibliographies By illuminating the shaping influence of multiculturalism on these writers the volume points to the lasting value of multiculturalism in the contemporary world      **The Prajnaparamita Literature** Edward Conze, 2023-06-20 The literature on Prajnaparamita vast deep and vital to an understanding of the Mahayana It has so far been neglected by the European scholars With the aim of facilitating the study the author has set out a certain amount of information about it Thus this handbook records for the use of scholars the very limited knowledge acquired during the last century      **The Vision of Vedic Poets** J. Roussillon-Constanty, 2013-11-25 The history of science provides numerous examples of the way in which imagination religion and mythology have sometimes helped and sometimes hindered scientific progress While established ideas and beliefs clearly held back the discoveries of Copernicus Galileo and Darwin the intuitive knowledge found in mythology art and religion has often proved useful in indicating new ways in which to explore or represent new knowledge of the world Stories fables and images have contributed to drawing a fuller picture of the past understanding the present and imagining the future The essays in this book written by academics writers and artists from various fields ranging from La Fontaine s fables to nanotechnology and modern art all point out the ways in which imagination works its way into all the fields of knowledge At both ends of the spectrum the hybrid nature of the chimera emerges as a pivotal symbol of both man s predation instinct and a powerful symbol of his fear of extinction This interdisciplinary book weaving together visual representation literature mysticism and science will appeal to historians of science philosophy art and religion It will also be of interest to scholars in cultural studies and anthropology Drawing on recent scientific research and artistic production the volume will additionally interest a wider audience wishing to learn more about man s obsession and fascination with the potent symbolism of dinosaurs and dragons and all hybrid forms generated by the human imagination and recent technology      Tibetan Muslims Fabienne Le Houérou, 2024 This book focuses on the minority of Tibetan Muslims among the Tibetan Diaspora Most scholars
