Manual of Infection Prevention and Control Nizam Damani, 2019. It has been estimated that in developed countries up to 10% of hospitalized patients develop infections every year. Not only is there a substantial cost to healthcare systems but some healthcare associated infections (HCIs) can be fatal. Since the majority of HCIs are preventable, reducing HCIs is now considered to be an integral part of patient safety and quality of care provided by all healthcare institutions worldwide. Unlike other books on infection control, the main strength of this book is to provide clear up to date and practical guidance in infection control in an easy to read format which can act as a quick source of reference on all aspects of HCI for healthcare workers who are either directly or indirectly involved in prevention and control of HCIs. Although the book's main audience is infection control practitioners such as doctors, nurses, public health physicians, it is also a valuable reference for environmental health officers, health educators, practice managers in GP surgeries and health service managers.
