Cordesman, Bryan Gold, 2014-03-12 The United States faces major challenges in dealing with Iran the threat of terrorism and the tide of political instability in the Arabian Peninsula The presence of some of the world s largest reserves of oil and natural gas vital shipping lanes and Shia populations throughout the region have made the peninsula the focal point of US and Iranian strategic competition Moreover large youth populations high unemployment rates and political systems with highly centralized power bases have posed other economic political and security challenges that the Gulf states must address and that the United States must take into consideration when forming strategy and policy **The Changing Military Balance in the Koreas and Northeast Asia**

Anthony H. Cordesman, Aaron Lin, 2015-07-07 The tensions between the Koreas and the potential involvement of China Japan Russia and the United States in a Korean conflict create a nearly open ended spectrum of possible conflicts These conflicts could range from posturing and threats to a major conventional conflict on the Korean peninsula with intervention by outside powers to the extreme of nuclear conflict The Korean balance is also affected by the uncertain mix of cooperation and

competition between the United States and China particularly with the U S pivot toward Asia and the steady modernization of Chinese forces This new volume up to date through Spring 2015 provides a detailed examination of the military forces in Northeast Asia North and South Korea China Russia Japan and the United States setting those forces in the larger geostrategic context *The Evolving Military Balance in the Korean Peninsula and Northeast Asia* Anthony H.

Cordesman,Ashley Hess,2013-07-10 *The Evolving Military Balance in the Korean Peninsula and Northeast Asia* describes the strategy force deployments and the military balance in potential current and future scenarios involving the Democratic People s Republic of Korea Republic of Korea People s Republic of China Japan and the United States The analysis in these volumes shows how tensions between the Koreas and the potential involvement of the China Japan Russia and the United States create a nearly open ended spectrum of possible conflicts These range from posturing and threats wars of intimidation to a major conventional conflict on the Korean Peninsula to intervention by outside powers like the United States and China to the extreme of nuclear conflict The analysis shows that the Korean balance is sharply affected by the uncertain mix of cooperation and competition between the United States and China The U S rebalancing of its forces to Asia and the steady modernization of Chinese forces in particular the growth of Chinese sea air missile capabilities affect the balance in the Koreas and Northeast Asia They also raise the possibility of far more intense conflicts that could extend far beyond the boundaries of the Koreas **Research Handbook on the Arms Trade** Andrew T.H. Tan,2020-12-25 This comprehensive

Research Handbook examines the key drivers of the arms trade mapping the main trends in Asia Europe the Middle East Africa and Latin America It also explores the principal defence markets internationally including the US China India Russia and the UK in greater detail **The Arms Race in Asia** Andrew T.H. Tan,2013-12-13 This book is the first systematic examination of the emerging arms race in Asia The global trade in arms is to a large degree underpinned by the strong demand for arms in Asia and the Middle East the two largest arms export markets in the world Of these two regions Asia has become particularly significant led by the emergence of China and India as major powers It is therefore not surprising that the rapid military modernisation in Asia accompanied by significant increases in the size and sophistication of armed forces has generated attention as to its trends key characteristics causes and implications This phenomenon which has become evident since the end of the Cold War has also been widely described as an Asian arms race This book evaluates the key conceptual ideas which can shed light on this phenomenon as well as examining the complex mix of internal external and technological factors that have led to its emergence The volume explores the way in which the arms race is leading ultimately to three distinctive blocs in the emerging geostrategic landscape a loose bloc of US allies in the region a counter bloc of potential US adversaries and a neutral bloc of states with industrial age armed forces whose allegiances will vary according to circumstances and geostrategic developments *The Arms Race in Asia* concludes that if the emerging arms race is left unchecked it is likely that Asia will increasingly become a region of instability marked by conflicts and interstate wars The

book will be of great interest to students of Asian politics strategic studies defence studies security studies and IR in general
