Bhambra,Julia McClure,2022-11-29 Imperial Inequalities takes Western European empires and their legacies as the explicit starting point for discussion of issues of taxation and welfare In doing so it addresses the institutional and fiscal processes involved in

modes of extraction taxation and the hierarchies of welfare distribution across Europe's global empires. The idea of imperial inequalities provides a conceptual frame for thinking about the long standing colonial histories that are responsible at least in part for the shape of present inequalities. This wide ranging volume challenges existing historiographical accounts that present states and empires as separate categories. Instead it views them as co constitutive units by focusing upon the politics of economic governance across imperial spaces. Authors examine the fiscal innovations that enabled European empires to finance their expansion, the politics of redistribution that were important to constructing the veneer of legitimacy of taxation and the fiscal mechanisms that were established to ensure that the imperial contours of inequality continued to define the postcolonial world. These diverse contributions provide new resources for how we think about issues of taxation and welfare across the longue durée. This book is relevant to United Nations Sustainable Development Goal 10 Reduced inequalities.

The Oxford Handbook of the Ends of Empire Martin Thomas, Andrew Thompson, 2018-12-06. The Oxford Handbook of the Ends of Empire offers the most comprehensive treatment of the causes, course and consequences of the ends of empire in the twentieth century. The volume's contributors convey the global reach of decolonization with chapters analysing the empires of Western Europe, Eastern Europe, China and Japan. The Handbook combines broad regional treatments of decolonization with chapter contributions constructed around particular themes or social issues. It considers how the history of decolonization is being rethought as a result of the rise of the new imperial history and its emphasis on race, gender and culture, as well as the more recent growth of interest in histories of globalization, transnational history and histories of migration and diaspora, humanitarianism and development and human rights. The Handbook in other words seeks to identify the processes and commonalities of experience that make decolonization a unique historical phenomenon with a lasting resonance. In light of decades of historical and social scientific scholarship on modernization, dependency, neo colonialism, failed state architectures and post colonial conflict, the obvious question that begs itself is when did empires actually end. In seeking to unravel this most basic dilemma, the Handbook explores the relationship between the study of decolonization and the study of globalization. It connects histories of the late colonial and post colonial worlds and considers the legacies of empire in European and formerly colonised societies.

Ecologies of Imperialism in Algeria Brock Cutler, 2023-10. Centered around a massive ecological disaster in which eight hundred thousand Algerians died between 1865 and 1872, *Ecologies of Imperialism in Algeria* explores how repeated performance of divisions across an expansive ecosystem produced modern imperialism in nineteenth century Algeria.

Colonial Food in Interwar Paris Lauren Janes, 2016-02-25. In the wake of the First World War, in which France suffered severe food shortages, colonial produce became an increasingly important element of the French diet. The colonial lobby seized upon these foodstuffs as powerful symbols of the importance of the colonial project to the life of the French nation. But how was colonial food really received by the French public? And what does this tell us about the place of empire in French society? In *Colonial Food in Interwar Paris*, Lauren Janes disputes the claim that empire

was central to French history and identity arguing that the distrust of colonial food reflected a wider disinterest in the empire. From Indochinese rice to North African grains and tropical fruit to curry powder this book offers an intriguing and original challenge to current orthodoxy about the centrality of empire to modern France by examining the place of colonial foods in the nation's capital.
