Emerging Market Portfolio Flows Mr. Serkan Arslanalp, Mr. Takahiro Tsuda, 2015-12-17 Portfolio flows to emerging markets EMs tend to be correlated A possible explanation is the role global benchmarks play in allocating capital internationally the so called benchmark effect This paper finds that benchmark driven investors indeed play a large role in a key segment of the market the EM local currency government bond market accounting for more than one third of total foreign holdings as of end 2014

We find that the prominence of these investors declined somewhat after the May 2013 taper tantrum but remain high This distinction is important in understanding the drivers of EM capital flows and their sensitivity to different types of shocks In particular a high share of benchmark driven investors may result in capital flows that are more sensitive to global shocks and less sensitive to country factors
