Dean, 2023-10-31 In a world that values power above all else we need to rethink God It s not just better athletes and bigger engines but weapons of mass destruction assault rifles lethal drugs Our obsession with stronger faster more and bigger everything is killing us and at the top of this power pyramid an all powerful God validates it all For those who want a theology justifying the power game in all its forms omnipotence is the perfect pretext but for a growing segment of our modern scientific world the notion of an all controlling deity sounds increasingly superstitious tribalistic People of faith must do better Our world needs a God whose nature is love not all controlling power That God the God who can t is even more powerful The survival of the world even the future of God may depend on us learning to say God always does everything God can do *Military Thought of Asia* Kaushik Roy, 2020-11-04 Military Thought of Asia challenges the assertion that the generation of rational secular ideas about the conduct of warfare is the preserve of the West by analysing the history of ideas of warfare in Asia from the ancient period to the present The volume takes a transcontinental and comparative approach to provide a broad overview of the evolution of military thought in Asia The military traditions and theories which have emerged

in different parts of Eurasia throughout history are products of geopolitics and unique to the different regions The book considers the systematic and tight representation of ideas by famous figures including Kautlya and Sun Tzu At the same time it also highlights publications on military affairs by small men like mid ranking officers and scattered ideas regarding the origin nature and societal impact of organised violence present in miscellaneous sources like coins inscriptions paintings and fictional literature In so doing the book fills a historiographical gap in scholarship on military thought which marginalises Asia to the part of cameo and historicises the evolution of theory and the praxis of warfare The volume shows that the East has a long unbroken tradition of conceptualising war and its place in society from the Classical Era to the Information Age It is essential reading for those interested in the evolution of military thought throughout history particularly in Asia
