Forensic Mental Health Assessment Kirk Heilbrun, David DeMatteo, Stephanie Brooks Holliday, Casey LaDuke, 2014

Forensic mental health assessment (FMHA) continues to develop and expand as a specialization. Since the publication of the First Edition of *Forensic Mental Health Assessment: A Casebook* over a decade ago, there have been a number of significant changes in the applicable law, ethics, science, and practice that have shaped the conceptual and empirical underpinnings of FMHA. The Second Edition of *Forensic Mental Health Assessment* is thoroughly updated in light of the developments and changes in the field while still keeping the unique structure of presenting cases, detailed reports, and specific teaching points on a wide range of topics. Unlike anything else in the literature, it provides genuine (although disguised) case material so trainees as well as legal and mental health professionals can review how high-quality forensic evaluation reports are written. It features contributions from leading experts in forensic psychology and psychiatry providing samples of work in their particular areas of specialization and it discusses case material in the larger context of broad foundational principles and specific teaching points, making it a valuable resource for teaching, training, and continuing education. Now featuring 50 real-world cases, this new edition covers topics including criminal responsibility, sexual offending, risk evaluation, federal sentencing, capital sentencing, capacity to consent to treatment, personal injury, harassment, and discrimination, guardianship, juvenile commitment, transfer, and decertification, response style, expert testimony, evaluations in a military context, and many more. It will be invaluable for anyone involved in assessments for the courts, including psychologists, psychiatrists, social workers, and attorneys, as well as for FMHA courses.
