Governance Reforms in European University Systems Karsten Krüger, Martí Parellada, Daniel Samoilovich, Andrée Sursock, 2018-02-21 This book examines governance reforms in higher education in six European countries Austria Denmark Finland France the Netherlands and Portugal It focuses in particular on the governance of the systems and institutions in these countries The book shows that each of the national reform processes has been

characterised by its own specific pathways embedded in the country's specific socio-economic contexts and cultures but also has a number of features in common with the other countries and processes. The first chapter of the book presents a conceptual framework to analyse the reform processes as an implementation game played by several actors with diverse interests. The second chapter describes the national reform processes of the six selected countries giving a voice to the individual university rectors and officials who played an important role during the reform processes. Their stories constitute a vivid narrative of the government drivers of reform and of the rationales of the institutions as main partners in the reform processes. These narratives are analysed complemented by and contrasted with a review of the literature on the subject in the third chapter. The final chapter consists of concluding remarks and lessons learned.

The Modernisation of European Universities Kwiek Marek, Kurkiewicz Andrzej, 2012-09-26. The recent decade brought about new ways of thinking about universities. European level educational policies became increasingly influential as the agenda of university reforms was viewed as part of greater Lisbon strategy reforms. National governments adopted the economic concept of the university consistently developed in subsequent official documents of the European Commission. The EU member states currently need to balance their educational policies between the requirements of policies promoted by the EU and the requirements of their national systems. Additionally, the national educational policies are under high pressure due to globalisation. European universities and European academics operate in the midst of these large scale changes. Their interpretations of and their responses to what is termed the modernisation agenda of European universities are at the core of this volume.
