Romanian Orthodox Diaspora in Italy Marco Guglielmi, 2022-08-02 This book provides a sociological understanding of transformations within Eastern Orthodoxy and the settlement of Orthodox diasporas in Western Europe Building a fresh framework on religion and migration through the lenses of religious glocalization it explores the Romanian Orthodox diaspora in Italy as a case study in the experience of Eastern Orthodoxy in a Western European country The research brings to light the Romanian Orthodox diaspora s reshaping of the more customary social traditionalism largely spread within Eastern Orthodoxy In its position as an immigrant group and religious minority the Romanian Orthodox diaspora develops socio cultural and religious encounters with the receiving environment and engages with certain contemporary challenges This book refutes the vague image of Orthodox Christianity as a monolithic religious system composed of passive religious institutions rather showing current Orthodox diasporas as flexible agents marked by dynamic features *Europeanization in a Global Context* Didem Buhari Gulmez, 2016-11-08 This book puts forward an original approach to Europeanization in a global context Following the world polity approach the author establishes the missing link between global European and domestic realms and reveals the multiplicity of dynamics and logics driving the reform process in European Union candidate countries A range of other topics are investigated including whether Europeanization is only driven by parochial strategic interests or by broader normative concerns and how we can make sense of the selectivity in domestic compliance with the EU without succumbing to binary thinking Focusing on the critical case of Turkey the book puts forward three varieties of Europeanization strategic normative and ritualized which underlie the complex dynamics that drive the reform processes in EU candidate countries It will be of interest to scholars and students with an interest in Sociology Political Science International Relations Globalization Europeanization European Studies and Turkish Studies **Transforming Europe Through Crises** Didem Buhari, Christian Kaunert, Seckin Baris Gulmez, 2022-11-28 How many Europes is a critical question that led to several attempts to analyse European crises and transformations globally This book builds upon the argument that Europe cannot be reduced to a singular dynamic identity or vision but rather provides a four fold taxonomy Thin Thick Parochial and Global Europe The book contributors aim to respond to the emerging necessity to incorporate both the parochial dynamics unmaking Europe and the globalist dynamics decentering Europe into the analysis of European crises and transformations in diverse sectors ranging from security and foreign policy to the rule of law and democracy Accordingly this book is unpacking Europe in a time of severe crises facing the EU such as Brexit the Syrian refugee crisis Catalan secessionism the rise of far right and terrorism which have accelerated the resurgence of formerly marginalized and repressed dynamics as influential trends in national regional and global politics It reveals an ongoing hegemonic struggle over the representation of Europe among many Europes involving two separate integrationist models of regionalization or Europe making and two distinct dynamics that have sought to fragment and de centre the European Union through nationalism and globalism respectively The chapters in this book were originally published as a special issue of European

Politics and Society Globalization/Glocalization: Developments in Theory and Application ,2021-11-29 In the immense literature on globalization the work of Roland Robertson stands out In particular his insistence that globalization manifests itself primarily as glocalization the simultaneity of the global and the local of homogenization and heterogenization continues to influence how a wide variety of observers understand the process including those who contest it In honour of Robertson s lifetime contributions this volume brings together a set of essays that demonstrate the cogency of his approach point out directions in which it can be further developed and illustrate the insight it can provide in topics as varied as religion football wine morality and UFOs Contributors include Peter Beyer John Boli Didem Buhari Gulmez Rebecca Catto Richard Giulianotti Ulf Hannerz David Inglis Paul James Habibul Haque Khondker Anne Sophie Krossa Frank Lechner Kristian Naglo John H Simpson Manfred B Steger and George M Thomas Europe in the Long Twentieth Century Christoph Cornelissen,2024-10-08 Thanks to their economic and military strength the European empires had achieved global supremacy by 1900 with large parts of the world under their dominance in the wake of colonial expansion This situation fuelled ideas of Europe s permanent almost natural global superiority especially among the middle classes However as early as the First World War such claims came under increasing pressure This volume explains the role played by modern nationalism and anti imperial movements the competition between different political orders changes in the economy and society and the great ideas and utopias Their interplay gave rise to enormously destructive forces in Europe From the Boer and Balkan wars before 1914 to the Yugoslav wars of the 1990s and the Ukraine war since 2022 they have produced a continuum of violence At the same time the great promise of political participation and social security is one of the constants of Europe s history in the long twentieth century Against this backdrop modern societies emerged whose values had moved far away from the older models Perceptions of the role of the sexes families and generations changed fundamentally In addition the major internal European migrations together with the global immigration that became increasingly significant after 1945 ensured that the ethnic profile of European societies changed considerably Europe in the Long Twentieth Century shows how on the one hand these different factors led to a Europeanisation of living and working conditions and at the same time how the political and economic integration of the countries of Europe progressed On the other hand it demonstrates how Europe s role in the global context changed fundamentally As much as the geopolitical provincialisation of Europe continued unabated Europeans were constantly searching for new ways to assert themselves throughout the long twentieth century The search continues Glocal Religions Victor Roudometof,2018-11-07 This book is a printed edition of the Special Issue Glocal Religions that was published in Religions *The Routledge Companion to Media Industries* Paul McDonald,2021-10-04 Bringing together 49 chapters from leading experts in media industries research this major collection offers an authoritative overview of the current state of scholarship while setting out proposals for expanding re thinking and innovating the field Media industries occupy a central place in modern societies producing circulating and presenting the

multitude of cultural forms and experiences we encounter in our daily lives The chapters in this volume begin by outlining key conceptual and critical perspectives while also presenting original interventions to prompt new lines of inquiry Other chapters then examine the impact of digitalization on the media industries intersections formed between industries or across geographic territories and the practices of doing media industries research and teaching General ideas and arguments are illustrated through specific examples and case studies drawn from a range of media sectors including advertising publishing comics news music film television branded entertainment live cinema experiences social media and music video Making a vital and significant contribution to media research this volume is essential reading for students and academics seeking to understand and evaluate the work of the media industries Chapter 10 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

A Cosmopolitan Approach to Literature Didier Coste, 2022-12-30 This cross disciplinary approach to literary reading of any provenance based on an experimental cosmopolitan epistemology de and recontextualizes the texts from the points of view of multiple cultures and historical moments enriching interpretation and aesthetic experience beyond the backgrounds of the present reader and the

origin of a particular literary discourse Trusting the authority of an author or an original text and ignoring the fundamental plurilingualism of the literary experience obstructs the wealth of cosmopolitan reading in a globalized and fragmented world A thorough critique of both local and overarching theories in clear dissent from the binaries of decolonial theory and the overextension of nomadic theory supports a precise research and teaching methodology at variance with past trends of Comparative and World Literature Considering literature as the aestheticized use of language which is universal the many analyses provided can be extrapolated to other genres eras and cultural areas **Glocalization** Victor

Roudometof, 2016-06-10 This book seeks to provide a critical introduction to the under theorized concept of Glocalization While the term has been slowly diffused into social scientific vocabulary to date there is no book in circulation that specifically discusses this concept Historically theorists have intertwined the concepts of the global and the glocal or have subsumed the glocal under other concepts such as cosmopolitanization Moreover theorists have failed to give local due attention in their theorizing The book argues that the terms global the local and the glocal are in need of unambiguous and theoretically and methodologically sound definitions This is a prerequisite for their effective operationalization and application into social research Glocalization is structured in two parts Part I introduces the term seeking to provide a history and critical assessment of theorists past use of glocalization and offering an alternative perspective and a clear effective and applicable definition of the term explaining the limitations of the term globalization and the value of defining glocalization Part II then moves on to illustrate how the concept of glocalization can be used to broaden our understanding and analysis of a wide range of issues in world politics including the 21st century culture of consumption transnationalism cosmopolitanism nationalism and religious traditions Utilizing a wide range of historical ethnographic and real life examples from various domains this work will be essential reading for students and scholars of Globalization and will be of great interest to those in the field of Global Transnational and Cosmopolitan Studies
