Flawless Execution Techniques Americas Business:

Flawless Execution James Daniel Murphy, 2005 **The Halo Effect** Phil Rosenzweig, 2008-12-09 Why do some companies prosper while others fail Despite great amounts of research many of the studies that claim to pin down the secret of success are based in pseudoscience THE HALO EFFECT is the outcome of that pseudoscience a myth that Philip Rosenzweig masterfully debunks in THE HALO EFFECT THE HALO EFFECT highlights the tendency of experts to point to the high financial performance of a successful company and then spread its golden glow to all of the company's attributes clear strategy strong values and brilliant leadership But in fact as Rosenzweig clearly illustrates the experts are not just wrong but deluded Rosenzweig suggests a more accurate way to think about leading a company a robust and clearheaded approach that can save any business from ultimate failure **Courage to Execute** James D. Murphy, 2014-01-08 How to build a culture of high performance within your organization The U S military in general and its many elite organizations in particular possesses a culture of high performance Courage to Execute outlines the six basic principles that operate at the foundation of high performance which include leadership organization communication knowledge experience and discipline known together as LOCKED When all are practiced effectively teamwork emerges But the most elusive quality that exists at the heart of all elite military teams the element that organizations and businesses deeply desire to perform more efficiently and effectively is trust Trust is easily spent but hard won Author James Murphy an employer of approximately fifty senior military officers that have served in elite units such as the U S Navy Blue Angels U S Navy SEALs and U S Army Rangers shares a multitude of personal leadership stories that illustrates the principles of LOCKED Shares compelling anecdotes from leaders in elite units of the U S Military Written by James D Murphy founder and CEO of Afterburner Inc which has trained over 1.5 million executives sales professionals and business people from every industry in Afterburner's Flawless Execution Model and its unique high energy programs Courage to Execute will help you develop effective leadership skills and build high performance teams that out compete your rivals every time Self-determination in Health Care Leroy C. Edozien, 2016-03-03 It is generally accepted in legal and bioethical discourse that the patient has a right to self determination In practice though this is often not the case Paternalism is waning and it is increasingly recognised that there are values other than medical factors which determine the choices that patients make Unfortunately these developments have not resulted in huge advances for patient self determination which is largely because the consent model has fundamental flaws that constrain its effectiveness This book sets out to offer an alternative model to consent In the property model proposed here the patient's bodily integrity is protected from unauthorised invasion and their legitimate expectation to be provided with the relevant information to make an informed decision is taken to be a proprietary right It is argued that the property model potentially overcomes the limitations of the consent model including the obstacle caused by the requirement to prove causation in consent cases The author proposes that this model could in the future provide an alternative or complementary

approach for the courts to consider when dealing with cases relating to self determination in health care

Critical Steps Tony Muschara, Ron Farris, Jim Marinus, 2021-11-18 Critical Steps happen every day at work and at home purposefully Work does not happen otherwise If an operation has the capacity to do work then it has the capacity to do harm Work is energy directed by human beings to create value But people are imperfect we make mistakes and sometimes we lose control of the work Therefore work is the use of force under conditions of uncertainty A Critical Step is a human action that will trigger immediate irreversible and intolerable harm to an asset if that action or a preceding action is performed improperly Whether the human action involves clicking on a link attached to an e mail message walking down a flight of stairs with a newborn baby in arms engaging the clutch on a gasoline driven chain saw or administering a medication to a patient in a hospital these all satisfy the definition of what constitutes critical risks in our daily lives professionally or personally The overarching goal of managing Critical Steps is to maximize the success safety reliability productivity quality profitability etc of people's performance in the workplace to create value for the organization without losing control of built in hazards necessary to create that value

Risk-Based Thinking Tony Muschara, 2017-11-13 Society at large tends to misunderstand what safety is all about It is not just the absence of harm When nothing bad happens over a period of time how do you know you are safe In reality safety is what you and your people do moment by moment day by day to protect assets from harm and to control the hazards inherent in your operations This is the purpose of risk based thinking the key element of the six building blocks of Human and Organizational Performance HOP Generally HOP provides a risk based approach to managing human performance in operations But specifically risk based thinking enables foresight and flexibility even when surprised to do what is necessary to protect assets from harm but also achieve mission success despite ongoing stresses or shocks to the operation Although you cannot prepare for every adverse scenario you can be ready for almost anything When risk based thinking is integrated into the DNA of an organization's way of doing business people will be ready for most unexpected situations Eventually safety becomes a core value not a priority to be negotiated with others depending on circumstances This book provides a coherent perspective on what executives and line managers within operational environments need to focus on to efficiently and effectively control learn and adapt
