

Install flow meter at low point of the system or with flow vertically up. Do not install at high point or with flow vertically down. On open drain lines with a drop of 5 metres or more install vacuum valve at high point.

Install in a U trap to ensure meter body is always completely full of liquid. Allow 10 diameters of straight pipe before the meter & 5 diameters after to develop a smooth flow profile through the meter. More specific requirements are shown below

Do not install close to pump inlet unless liner is suitable for vacuum operation, install meter 10D downstream of pump, or consider flow stabiliser. An upwardly sloping pipe is a good installation choice.
