Elliott,Larry Percy,Simon Pervan,2011-03-10 Strategic Brand Management Second Edition adopts an innovative socio cultural perspective that provides students with an understanding of the dynamics of the field and enables them to engage with the issues that lie within At the same time the text also integrates more traditional notions of the brand in terms of equity and positioning The

wide experience of the author team from consulting with industry leaders to teaching demanding MBA and executive development courses has resulted in a text full of exciting ideas that are firmly grounded in managerial implications and applications Building on a solid theoretical foundation the authors also apply theory to examples throughout helping students to understand the practical applications of brand management By using a wealth of new and up to date illustrative examples and case material including coverage of high tech innovation they have created a text that is both cutting edge in terms of theory and also accessible to students *Museum Curatorship in the National Park Service, 1904-1982* Ralph H. Lewis, 1993

**Cars & Parts**, 1990 *Fatal Abstraction: Why the Managerial Class Loses Control of Software* Darryl

Campbell, 2025-04-08 A tech insider explains how capitalism and software development make for such a dangerous mix Software was supposed to radically improve society Outdated mechanical systems would be easily replaced programs like PowerPoint would make information flow more freely social media platforms like Facebook would bring people together and generative AI would solve the world's greatest ills Yet in practice few of the systems we looked to with such high hopes have lived up to their fundamental mandate In fact in too many cases they've made things worse exposing us to immense risk at the societal and the individual levels How did we get to this point In *Fatal Abstraction* Darryl Campbell shows that the problem is managerial software programs created and overseen not by engineers but by professional managers with only the most superficial knowledge of technology itself The managerial ethos dominates the modern tech industry from its globe spanning giants all the way down to its trendy startups It demands that corporate leaders should be specialists in business rather than experts in their company's field that they manage their companies exclusively through the abstractions of finance and that profit margins must take priority over developing a quality product that is safe for the consumer and beneficial for society These corporations rush the development process and package cheap unproven potentially dangerous software inside sleek and shiny new devices As Campbell demonstrates the problem with software is distinct from that of other consumer products because of how quickly it can scale to the dimensions of the world itself and because its inner workings resist the efforts of many professional managers to understand it with their limited technical background A former tech worker himself Campbell shows how managerial software fails and when it does what sorts of disastrous consequences ensue from the Boeing 737 MAX crashes to a deadly self-driving car to PowerPoint propaganda and beyond Yet just because the tech industry is currently breaking its core promise does not mean the industry cannot change or that the risks posed by managerial software should necessarily persist into the future Campbell argues that the solution is tech workers with actual expertise establishing industry wide principles of ethics and safety that corporations would be forced to follow *Fatal Abstraction* is a stirring rebuke of the tech industry's current managerial excesses and also a hopeful glimpse of what a world shaped by good software can offer *Reagan's Cowboys* John B. Roberts II, 2020-06-29 When rumors about Geraldine Ferraro the first woman vice presidential nominee by a major party in U.S. history reached First Lady Nancy Reagan during

the 1984 presidential election a secret operation was launched to investigate her It revealed Ferraro s ties to organized crime and the extent to which she would have been subject to pressure or blackmail by the Mafia if elected Written by an insider responsible for running the investigation this never before told story goes behind the scenes as an incumbent president s campaign works to expose a political opponent s mob connections Part detective story part political thriller the narrative features all the major players in the Reagan White House and 1984 reelection committee with revealing anecdotes about Ronald and Nancy Reagan

Electric and Hybrid Cars Curtis D. Anderson, Judy Anderson, 2010-03-30 This illustrated history chronicles electric and hybrid cars from the late 19th century to today s fuel cell and plug in automobiles It describes the politics technology marketing strategies and environmental issues that have impacted electric and hybrid cars research and development The important marketing shift from a woman s car to going green is discussed Milestone projects and technologies such as early batteries hydrogen and bio mass fuel cells the upsurge of hybrid vehicles and the various regulations and market forces that have shaped the industry are also covered
