E. Britton, David L. Gilday, Michael Maisey, 2013-12-11 Nuclear medicine is the bridge between a particular clinical problem and a relevant test using radionuclides It began as a minor technical tool used in a few branches of medicine notably endocrinology and nephrology However throughout the world it has now become established as a clinical discipline in its own right with specific training programmes special skills and a particular approach to patient management Although the practising nuclear medicine physician must necessarily learn a great deal of basic science and technology a sound medical training and a clinical approach to the subject remains of fundamental importance It is for this reason that we have attempted in this book to approach the subject from a clinical standpoint including where necessary relevant physiological material There exist many excellent texts which cover the basic science and technology of nuclear medicine We have therefore severely limited our coverage of these aspects of the subject to matters which we felt to be essential particularly those which have been less well covered in other texts for example the contents of Chapter 20 on Measurement by Royal and McNeill Similarly we have limited details of methodology to skeletal summaries of protocol Appendix 1 and have included at the end of some chapters descriptions of particular techniques where we and the authors felt that it would be helpful Understanding Pathophysiology - ANZ adaptation Judy Craft, Christopher Gordon, Sue E. Huether, Kathryn L. McCance, Valentina L. Brashers, 2010-10-22 A new pathophysiology textbook specifically for Australian and New Zealand nursing students Understanding Pathophysiology provides nursing students with the optimal balance between science clinical case

material and pharmacology With entrenched bio medical terminology that can be difficult to relate to nursing practice pathophysiology is a complex though essential component of all undergraduate nursing courses Understanding Pathophysiology ANZ Edition overcomes this difficulty by presenting the topic in an accessible manner appropriate to undergraduate nursing students in Australia and New Zealand The book prioritises diseases relevant to nursing students and presents them according to prevalence and rate of incidence in Australia and New Zealand This focused approach prepares students for the presentations they will experience in a clinical setting Understanding Pathophysiology ANZ Edition explores each body system first by structure and function then by alteration This establishes the physiology prior to addressing the diseases relative to the system and allows students to analyse and compare the normal versus altered state This local edition of Understanding Pathophysiology incorporates a lifespan approach and explores contemporary health with specific chapters on stress genes and the environment obesity and diabetes cancer mental illness and Indigenous health issues Clinical case studies are included in each chapter with each patient case study highlighting the relevant medical symptoms of a given disease within a clinical setting This is then analysed with respect to the relevancy of each symptom their respective affect on body systems and the best course of pharmacological treatment Elsevier s Evolve website provides extensive support materials for students and lecturers Also available for purchase with this textbook is an e book Pathophysiology Online a set of online modules and a mobile study guide application pathophysiology presented at an appropriate level for undergraduate nursing students in Australia and New Zealand an adaptation of a US edition Understanding Pathophysiology 4th Edition diseases are addressed according to prevalence incidence and relevance a systems approach is incorporated with a lifespan approach within the alterations chapters a new section on contemporary health issues examines the effects of an aging population and lifestyle choices on a society s overall health new chapters on topics including homeostasis genes and the environment obesity and diabetes mental health and Indigenous health issues chapter outlines and key terms appear at the beginning of each chapter concept maps provide visual representation of the key concepts addressed in each chapter clinical case studies feature in each chapter to bring pathophysiology into practice helpful focus on learning boxes in each chapter key terms are bolded in the text and listed in the glossary summaries of main points feature in each chapter review questions at chapter end are accompanied by answers provided online
