3

Q.20 Why Northern plains are densely populated? If you move from Uttarakhand to West Bengal, name the sections of Northern plains you will cross. Explain any one.

3

Q.21 Read the extract and answer the questions given below

3

If you work out the latitudinal and longitudinal extent of India, they are roughly about 30 degrees, whereas the actual distance measured from north to south extremity is 3,214 km, and that from east to west is only 2,933 km.

This difference is based on the fact that the distance between two longitudes decreases towards the poles whereas the distance between two latitudes remains the same everywhere.

From the values of latitude, it is understood that the southern part of the country lies within the tropics and the northern part lies in the sub-tropical zone or the warm temperate zone. This location is responsible for large variations in land forms, climate, soil types and natural vegetation in the country.

Now, let us observe the longitudinal extent and its implications on the Indian people. From the values of longitude, it is quite discernible that there is a variation of nearly 30 degrees, which causes a time difference of nearly two hours between the easternmost and the westernmost parts of our country.

A) How the distance between latitude and longitude varies from equator to poles?

B) What types of variations are caused due to large latitudinal extension?

C) What is the local time interval between Gujarat and Arunachal Pradesh?

The End of Public Schools David W. Hursh, 2015-10-16 The End of Public Schools analyzes the effect of foundations corporations and non governmental organizations on the rise of neoliberal principles in public education By first contextualizing the privatization of education within the context of a larger educational crisis and with particular emphasis on the Gates Foundation and influential state and national politicians it describes how specific policies that limit public control are advanced across all levels Informed by a thorough understanding of issues such as standardized testing teacher tenure and charter schools David Hursh provides a political and pedagogical critique of the current school reform movement as well details about the increasing resistance efforts on the part of parents teachers and the general public

Seeking Truth and Hiding Facts Jeremy L. Wallace, 2023 A unique analysis of the numbers that came to define Chinese politics and how this quantification evolved over time For decades a few numbers came to define Chinese politics until those numbers did not count what mattered and what they counted did not measure up Seeking Truth and Hiding Facts argues that the Chinese government adopted a system of limited quantified vision in order to survive the disasters unleashed by Mao Zedong's ideological leadership Jeremy Wallace explains how that system worked and analyzes how the problems that accumulated in its blind spots led Xi Jinping to take drastic action Xi's neopolitical turn aggressive anti corruption campaigns reassertion of party authority and personalization of power is an attempt fix the problems of the prior system as well as a hedge against an inability to do so The book argues that while of course dictators stay in power through coercion and cooptation they also do so by convincing their populations and themselves of their right to rule Quantification is one tool in this persuasive arsenal but it comes with its own perils
