Marianne Knaus,2015-04-23 We encounter mathematics on a regular basis in one form or another For some people maths is scary and not something they feel confident about Even though many educators and parents attempt to provide good mathematics experiences there is still a high level of anxiety about the teaching and learning of mathematics This book presents a broad range of concepts and aims to widen the narrow view that maths for young children is just about numbers and shapes The content includes pattern early algebra counting number early operations measurement shape and spatial awareness geometry matching sorting data analysis and the introduction of chance statistics and probability This book is intended for educators and parents who would like to explore and investigate maths concepts to enrich children s experiences and extend their current thinking and learning **Coordinating English at Key Stage 1** Narinderjit Gill,Jenny Tyrrell,2012-11-12 This handbook has been specially written for primary teachers who have responsibility for coordinating English at Key Stage 1 It goes step by step through every stage of coordinating English in primary schools and provides valuable information for teachers who are new to being a subject leader as well as those with more experience Full of accessible advice and suggestions for improving practice the handbook shows how a coordinator can create policies and links that work exploit resources to the best effect and develop the knowledge and expertise that will raise school standards

Teaching Young Children Mathematics Sydney L. Schwartz,2005-09-30 Children learn mathematics most effectively in contexts that are meaningful to them Realizing the potential of these contexts for fostering young children s mathematical learning while nurturing and challenging them requires knowledge of mathematics as well as of child development Avoiding the debates surrounding hands on learning vs direct instruction the author focuses on the value of different contexts for learning and illustrates ways to genuinely engage children as active learners The work is rich with examples of children s

interactions with each other and with adults as they utilize and extend their understanding of mathematics Examples and guidelines for developing lessons and activities will be useful to educators and parents Chapters explore how we underestimate young children s mathematical capabilities how appropriate sequencing of learning and building on prior knowledge will enhance understanding what teachers including parent teachers need to know and high stakes testing This is a work that brings together the connections between knowing the basics and constructing knowledge in accessible and practical ways

Adult Teaching and Learning: Developing Your Practice Sue Cross,2009-08-16 This is a guide to teaching and learning in the real world The author encourages us to understand current theories about how people learn and can best be helped to learn while urging us to question our assumptions recognise the importance of context and reflect on our own understanding of what it means to be an adult learner John Field Professor of Lifelong Learning and Co Director of the Centre for Research in Lifelong Learning University of Stirling UK This book is an essential guide to developing your practice in adult teaching and learning Key features include Exploration of key theoretical issues which are related directly to real learning contexts Practical ideas and suggestions to promote the development of teaching practice in new ways Conceptual tools for reflective practice Informed by the author s rich theoretical knowledge and practical experience of the field this book encourages you to reflect on your own personal practice and understanding In this way it re frames the teaching and learning process and puts the focus on the professional character of the teacher recognising the extent to which the personal approach adopted by individual teachers shapes learning experiences Through the use of case studies and examples drawn from a wide variety of learning environments it promotes a dynamic and engaging approach and encourages you to experiment with new ways of teaching These examples are ideal for new teachers facing the daunting prospect of engaging motivating and challenging their learners in their first teaching roles For the more practically experienced it presents a vital stimulus to reflection for the purposes of professional development or accredited study This thoughtful book is important reading for anyone with the responsibility for the learning of adults whether a student new teacher or experienced professional
