Clearing the Air Gregory Wood, 2016-10-14 In *Clearing the Air* Gregory Wood examines smoking's importance to the social and cultural history of working people in the twentieth century United States Now that most workplaces in the United States are smoke free it may be difficult to imagine the influence that nicotine addiction once had on the politics of worker resistance workplace management occupational health vice moral reform grassroots activism and the labor movement The experiences social relations demands and disputes that accompanied smoking in the workplace in turn shaped the histories of antismoking politics and tobacco control The steady expansion of cigarette smoking among men women and children during the first half of the twentieth century brought working people into sustained conflict with managers demands for diligent attention to labor processes and work rules

Addiction to nicotine led smokers to resist and challenge policies that coldly stood between them and the cigarettes they craved Wood argues that workers varying abilities to smoke on the job stemmed from the success or failure of sustained opposition to employer policies that restricted or banned smoking During World War II workers in defense industries for example struck against workplace smoking bans By the 1970s opponents of smoking in workplaces began to organize and changing medical knowledge and dwindling union power contributed further to the downfall of workplace smoking The demise of the ability to smoke on the job over the past four decades serves as an important indicator of how the power of workers influence in labor management relations has dwindled over the same period New Ergonomics Perspective Sakae Yamamoto,Masahiro Shibuya,Hiroyuki Izumi,Yuh-Chuan Shih,Chiuhsiang Joe Lin,Hyeon-Kyo Lim,2015-01-06 New Ergonomics Perspective represents a selection of the papers presented at the 10th Pan Pacific Conference on Ergonomics PPCOE held in Tokyo Japan August 25 28 2014 The first Pan Pacific Conference on Occupational Ergonomics was held in 1990 at the University of Occupational and Environmental Health Japan The main theme of the PPCOE 1990 **The Breakdown of Higher Education** John M. Ellis,2020-03-17 A series of near riots on campuses aimed at silencing guest speakers has exposed the fact that our universities are no longer devoted to the free exchange of ideas in pursuit of truth But this hostility to free speech is only a symptom of a deeper problem writes John Ellis Having watched the deterioration of academia up close for the past fifty years Ellis locates the core of the problem in a change in the composition of the faculty during this time from mildly left leaning to almost exclusively leftist He explains how astonishing historical luck led to the success of a plan first devised by a small group of activists to use college campuses to promote radical politics and why laws and regulations designed to prevent the politicizing of higher education proved insufficient Ellis shows that political motivation is always destructive of higher learning Even science and technology departments are not immune The corruption of universities by radical politics also does wider damage to primary and secondary education to race relations to preparation for the workplace and to the political and social fabric of the nation Commonly suggested remedies new free speech rules or enforced right of center appointments will fail because they don't touch the core problem a controlling faculty majority of political activists with no real interest in scholarship This book proposes more drastic and effective reform measures The first step is for Americans to recognize that vast sums of public money intended for education are being diverted to a political agenda and to demand that this fraud be stopped
