**Difficulties in Cataract Surgery** Artashes Zilfyan, 2018-06-13 For thousands of years cataract surgery continues to be the pearl of ophthalmic surgery It is explained by the fact that cataract removal always leads to an increase in visual acuity of patients A new technology of cataract removal phacoemulsification was introduced by Charles Kelman in 1967 Despite this it was difficult for the surgeons to transform

from extracapsular cataract extraction to the new method phacoemulsification Recently in the ophthalmological practice the method of femtolasar cataract surgery FLACS has been introduced This method allows you to automatically perform the basic stages of cataract surgery corneal incisions capsulorhexis nucleus fracture At the same time to apply the various techniques of cataract surgery the surgeon must possess virtually all the necessary techniques This is dictated by the fact that as a rule cataract itself is rarely isolated senile Knowledge of the basic rules of cataract surgery the use of pupillary rings and iris retractors in narrow pupils the use of capsular rings in subluxations of the lens the use of special modes of phaco in severe late cataracts and a comprehensive clinical way of thinking can undoubtedly reduce the complications of cataract surgery
