Picciano, Joel Spring, 2013-05-07 The Great American Education Industrial Complex examines the structure and nature of national networks and enterprises that seek to influence public education policy in accord with their own goals and objectives In the past twenty years significant changes have taken place in the way various interest groups seek to influence policies and practices in public education in the United States No longer left to the experience and knowledge of educators American education has become as much the domain of private organizations corporate entities and political agents who see it as a market for their ideas technologies and ultimately profits Picciano and Spring posit that educational technology is the vehicle whereby these separate movements organizations and individuals have become integrated in a powerful common entity and detail how the educational industrial complex has grown and strengthened its position of influence This timely carefully documented well argued book brings together Picciano's perspective and expertise in the field of technology and policy issues and Spring's in the history and politics of education in a unique critical analysis of the education industrial complex and its implications for the future *Digital Schools* Darrell M. West, 2013-07-15 Nearly a century ago famed educator John Dewey said that if we teach today's students as we taught yesterday's we rob them of tomorrow That wisdom resonates more strongly than ever today and that maxim underlies this insightful look at the present and future of education in the digital age As Darrell West makes clear today's educational institutions must reinvent themselves to engage students successfully and provide them with the skills needed to compete in an increasingly global technological and online world Otherwise the American education system will continue to fall woefully short in its mission to prepare the population to survive and thrive in a rapidly changing world West examines new models of education made possible by enhanced information technology new approaches that will make public education in the post industrial age more relevant efficient and ultimately more productive Innovative pilot programs are popping up all over the nation experimenting with different forms

of organization and delivery systems Digital Schools surveys this promising new landscape examining in particular personalized learning realtime student assessment ways to enhance teacher evaluation the untapped potential of distance learning and the ways in which technology can improve the effectiveness of special education and foreign language instruction West illustrates the potential contributions of blogs wikis social media and video games and augmented reality in K 12 and higher education Technology by itself will not remake education But if today s schools combine increased digitization with needed improvements in organization operations and culture we can overcome current barriers produce better results and improve the manner in which schools function And we can get back to teaching for tomorrow rather than for yesterday **Apps for Learning** Harry J. was used in this study which included classroom observations and assessments surveys for both students and teachers and interviews with parents through home visits Findings show that iPad integration in an Algebra 2 class led to a slight increase in student achievement as well as student participation and peer collaboration However interviews with parents and data from teacher surveys indicates that iPads can easily turn out to be a great distraction for students if it does not happen along with instructional coherence and comprehensive changes in class By highlighting a number of caveats with the effective implementation of iPads and exploring the appropriate use of iPads in schools the findings of this research shed light on avenues where educational leaders and policy makers are charged with making the decision of whether to use iPads in classrooms in their districts as a valid educational tool of choice
