**Accounting Standards****BASIC CONCEPTS****Accounting Standards (ASs)**

Accounting Standards (ASs) are written policy documents issued by expert accounting body or by government or other regulatory body covering the aspects of recognition, measurement, presentation and disclosure of accounting transactions in the financial statements. Accounting Standards 1, 2, 3, 6, 7, 9, 10, 13 and 14 are covered in this paper.

**Applicability of Accounting Standards****Question 1**

*What are the issues, with which Accounting Standards deal?*

**Answer**

Accounting Standards deal with the issues of

- (i) Recognition of events and transactions in the financial statements,
- (ii) Measurement of these transactions and events,
- (iii) Presentation of these transactions and events in the financial statements in a manner that is meaningful and understandable to the reader, and
- (iv) Disclosure requirements which should be there to enable the public at large and the stakeholders and the potential investors in particular, to get an insight into what these financial statements are trying to reflect and thereby facilitating them to take prudent and informed business decisions.

**Question 2**

*List the criteria to be applied for rating a non-corporate entity as Level-I entity for the purpose of compliance of Accounting Standards in India.*

**Answer**

Non-corporate entities which fall in any one or more of the following categories, at the end of the relevant accounting period, are classified as Level I entities:

**Sustainable Energy in Kazakhstan** Yelena Kalyuzhnova,Richard Pomfret,2017-07-06 Kazakhstan is rich in natural resources including coal oil natural gas and uranium and has significant renewable potential from wind solar hydro and biomass In spite of this the country is currently dependent upon fossil fuels with coal fired plants accounting for 75% of total power generation leading to concerns over greenhouse gas emissions and impacts on human health and the environment This book analyses the implications of the global shift to cleaner energy for a country whose economy has centred on hydrocarbon exports The challenge is urgent for Kazakhstan whose recent economic growth has driven increased demand for energy services making the construction of additional

generating capacity increasingly necessary for enabling sustained growth In this context renewable energy resources are becoming an increasingly attractive option to help bridge the demand supply gap Chapters written by experts in the field provide a comprehensive review of the current energy situation in Kazakhstan including fossil energy and renewable resources and analyses policy drivers for the energy sector Emphasising that clean energy covers a variety of renewables as well as cleaner use of hydrocarbons this book argues that future technological change will affect the relative attractiveness of the various choices Recognising technical geographical and domestic and international political constraints on policymakers options this book will be of interest to an interdisciplinary audience in the fields of resource management and clean energy development economics and Central Asian Studies      *Sustainable Finance and Banking* Marcel Jeucken,2010-09-23 Banking and finance play a fundamental role in public policy and economic performance as well as in all forms of commerce and industry They are crucial in determining whether society from governments to individual consumers succeeds in following an environmentally sustainable path However those working in the financial sector are largely unaware of the rationale and pressures for sustainable development and its bearing on their work while those in the relevant research and policy areas commonly overlook how vital the financial sector is for progress Marcel Jeucken sets out to rectify this state of affairs in a style which is accessible to those with no experience of environmental finance issues He provides a comprehensive account of their interdependence why the financial sector is crucial to achieving sustainability and why the triple bottom line of commercial environmental and social success points the way forward for banking From a systematic assessment of major banks around the world he presents a comprehensive account of current best practice an analysis of the differences in approach and performance and recommendations of actions and policies for improved performance that will contribute to sustainable development      **Carbon Dioxide Capture and Storage** Intergovernmental Panel on Climate Change. Working Group III.,2005-12-19 IPCC Report on sources capture transport and storage of CO<sub>2</sub> for researchers policy makers and engineers      **Renewable and Efficient Electric Power Systems** Gilbert M. Masters,2005-01-03 This is a comprehensive textbook for the new trend of distributed power generation systems and renewable energy sources in electric power systems It covers the complete range of topics from fundamental concepts to major technologies as well as advanced topics for power consumers An Instructor s Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department to obtain the manual send an email to [ialine@wiley.com](mailto:ialine@wiley.com)      Emissions of Greenhouse Gases in the United States, 1996 United States. Energy Information Administration,1997      *Economic Analysis of Land Use in Global Climate Change Policy* Thomas W. Hertel,Steven K. Rose,Richard S. J. Tol,2009-05-07 Land has long been overlooked in economics That is now changing A substantial part of the solution to the climate crisis may lie in growing crops for fuel and using trees for storing carbon This book investigates the potential of these options to reduce greenhouse gas emissions estimates the costs to the economy and analyses the trade offs with growing food The first part presents new

databases that are necessary to underpin policy relevant research in the field of climate change while describing and critically assessing the underlying data the methodologies used and the first applications Together the new data and the extended models allow for a thorough and comprehensive analysis of a land use and climate policy This book outlines key empirical and analytical issues associated with modelling land use and land use change in the context of global climate change policy It places special emphasis on the economy wide competition for land and other resources especially The implications of changes in land use for the cost of climate change mitigation Land use change as a result of mitigation and Feedback from changes in the global climate to land use By offering synthesis and evaluation of a variety of different approaches to this challenging field of research this book will serve as a key reference for future work in the economic analysis of land use and climate change policy

**The Politics of Carbon Markets** Benjamin Stephan, Richard Lane, 2014-08-27 The carbon markets are in the middle of a fundamental crisis a crisis marked by collapsing prices fleeing actors and ever increasing greenhouse gas levels Yet carbon trading remains at the heart of global attempts to respond to climate change Not only this but markets continue to proliferate particularly in the Global South The Politics of Carbon Markets helps to make sense of this paradox and brings two urgently needed insights to the analysis of carbon markets First the markets must be understood in relation to the politics involved in their development maintenance and opposition Second this politics is multiform and pervasive Implementation of new techniques and measuring tools policy development and contestation and the structuring context of institutional settings and macro social forces all involve a variety of political actors and create new forms of political agency The contributions study the total extent of the carbon markets from their prehistory to their contemporary expansion and wider impacts This wide ranging political perspective on the carbon markets is invaluable to those studying and interested in ecological markets climate change governance and environmental politics

**Sustainability in Finance** Marcel Jeucken, 2004 Financial institutions are often the crucial factor in a society's progress toward sustainable development Yet financial workers and public policy researchers are largely unaware of this role Sustainability in Finance seeks to bridge this gap as it posits a theoretical foundation for a finance policy partnership The volume presents an innovative analysis of current practices at both global financial institutions and banks in developing countries and ultimately offers a valuable consideration of the future of sustainable development

**Non-CO2 Greenhouse Gases: Scientific Understanding, Control and Implementation** J. van Ham, A.P.M. Baede, L.A. Meyer, R.

Ybema, 2013-06-29 In the climate change discussion non CO2 greenhouse gases NCGGs received official political recognition for the first time in 1997 when agreement was reached on the Kyoto Protocol As a result methane nitrous oxide HFCs PFCs and SF6 now provide attractive options for detailing the national targets for the reduction of greenhouse gas emissions meant to control climate change This book is the second volume in this area and addresses three main topics Firstly it documents progress with respect to our knowledge of the sources and sinks of NCGGs Information on this subject is essential

in order to reduce the uncertainties in national emissions inventories which serve as the reference values for commitments of countries in the framework of the Kyoto Protocol Secondly this volume deals with the control options for the NCGGs and contains a wealth of information in this area Emerging technologies here provide business opportunities in particular in connection with the flexible mechanisms for mitigation projects in developing countries which have been agreed in Kyoto Thirdly the book treats the policy implementation of mitigation options for greenhouse gas emissions Tools for control policies both on the national and international level and for different sectors of industry are discussed National integrated approaches including the ones from the United States Environmental Protection Agency and the Netherlands Ministry of Environment which both sponsored the conference provide guidance for defining the most effective greenhouse gases mitigation plans in different situations This volume is being published in support of the IPCC Process and will serve as a reference for IPCC s Third Assessment Report

Good practices for integrating gender equality and women's empowerment in climate-smart agriculture programmes Food and Agriculture Organization of the United Nations, 2019-05-31 This guidance entitled Integrating Gender Equality and Women s Empowerment in CSA Programs focuses on a set of agricultural practices to be implemented by small scale food producers in developing countries The purpose of this document is to provide agriculture development practitioners and policy makers globally with guidance tools and examples of successful integration of gender equality and women s empowerment GEWE into climate smart agriculture CSA work by demonstrating the necessity and benefits of incorporating a GEWE approach in CSA work and presenting tested strategies for enhancing the engagement of women and particularly vulnerable groups in CSA work With a view towards accelerating the impacts of country programs FAO and CARE have partnered to develop this guidance to help policy makers and practitioners meet the ambitious goals of the SDGs and the 2030 Agenda
