How to Read a Novel John Sutherland, 2013-12-10 Do we still know how to read a novel John Sutherland Chairman of the 2005 Booker Prize Committee asks His disheartened answer is an unequivocal No But Sutherland has not given up hope With acerbic wit and intellect he traces the history of what it used to mean to be well read and tells readers what it still means today Using this delightful book as a means to an end he reminds readers how the delicate charms of fiction can be at once wonderful and inspired and infuriating On one level this is a book about novels how they work what they're about what makes them good or bad and how to talk about them At a deeper level this is a book in which one of the most intimate test is described one in which a reader meets a novel Will a great love affair begin Will the rendezvous end in disappointment Who can say In order for the relationship to take its appropriate course all the details must be clearly acknowledged and understood for their complexities plot point of view character style pace first and last sentences and even beauty Still Sutherland knows a true understanding of fiction is more than a flirtation with text and style it is a business Taking his readers on a trip to the bookshop he helps them judge a book by its cover based on design and color wondering aloud what genre might be best even going so far as to analyze one of the latest American bestsellers to further help the buying reader choose the novel that is right for him or her In a book that is as wry and humorous as it is learned and opinionated John Sutherland tells you everything you always wanted to know about how to read fiction better than you do now but were afraid to ask

Experience with Technology Ali al-Azzawi, 2013-09-16 With a focus on gaining an empirically derived understanding of the underlying psychological dimensions and processes behind people's experiences with technology this book contributes to the debate of user experience UX within several disciplines including HCI design and marketing It analyses UX dynamics at various time scales and explores the very nature of time and meaning in the context of UX Experience with Technology uses personal construct theory PCT as a theoretical and methodological starting point to this project Major case studies are described that examine people's experiences with mobile media devices The results show a group of super ordinate constructs that upon interaction undergo a change in the way they vary and relate to each other as well as the development of a high reliability UX Scale The book concludes by proposing the ICE Interaction Construction and Evaluation model of UX that consolidates its findings into a workable framework of UX The proposed framework will be of particular use to designers and practitioners and forms an empirically grounded starting point for further research
