and big data offers his vision of the future world taking shape around us Jian Wang was the founder and architect of Alibaba s cloud and has been the driving force behind its technology innovations He was also the founder of the City Brain initiative to develop a new digital infrastructure for sustainable cities Being Online is his meditation on the moment we are in as the digital era shifts to the internet era spawning new innovations at a seemingly dizzying pace cloud computing 5G artificial intelligence big data wearables robots virtual reality the internet of things blockchain and more For Wang the invisible hand that connects them is being online The conjunction of computing data and the internet has erased the difference between being online and off When computing can be done in the cloud it is on the road to becoming a utility When data is connected making it big its usefulness multiplies exponentially in unforeseeable ways as does its value This moment will be as

transformative for humanity as Henry Ford's production line Data is changing the nature of business Computing is reshaping the economy The cloud will help us do things we could never do before at scales that were previously impossible It will reshape our vision of the world as electrification once did and more recently the transition from analog to digital While telling the story of Alibaba's breakthroughs and the development of his own understanding of the internet Jian Wang's visionary book lays out the implications of this shift and how to think about being online Mobile Technology Consumption: Opportunities and Challenges Ciaramitaro, Barbara L.,2011-10-31 Whether used for communication entertainment socio economic growth crowd sourcing social and political events monitoring vital signs in patients helping to drive vehicles or delivering education mobile technology has been transformed from a mode to a medium Mobile Technology Consumption Opportunities and Challenges explores essential questions related to the cost benefit individual and social impact and security risks associated with the rapid consumption of mobile technology This book presents the current state of mobile technologies and their use in various domains including education healthcare government entertainment and emerging economic sectors **Outsourcing Information Technology** Robert Austin Hattan,2010-05-12 A study to examine the strengths weaknesses opportunities threats and unintended consequences of outsourcing IT **Godt i gang med Outlook 2011 til Mac** Peter Jensen,2012-09-28 **Digital Wars** Charles Arthur,2012-03-03 Which of Apple Google and Microsoft had an office with a drawer of broken dreams and what real objects lay inside it When did Microsoft have the chance to catch Google in making money from search and who vetoed it Why did Google test 40 shades of blue on its users How long did outside developers wait before asking to write apps for Apple's iPhone after Steve Jobs announced it Who said that Microsoft should have its own music player and why did it fail The answers and much more can be found in this new book by Charles Arthur technology editor of The Guardian newspaper of London Digital Wars starts in 1998 when the internet and computing business was about to be upended by an antitrust case a tiny start up and a former giant rebuilding itself It looks at what are now the three best known tech companies and through the voices of former and current staff examines their different strategies to try to win the battle to control the exploding network connecting the world Microsoft was a giant soon to become the highest valued company in the world while Apple was a minnow and Google just a startup By February 10 2012 Apple was worth more 462bn than both Microsoft 258bn and Google 198bn combined The chance had come from tumultuous battles between the three To win their battles Apple used design the vertical model of controlling the hardware and software and a relentless focus on the customer to the exclusion of others Microsoft depended on the high quality of its employees programming skills and its monopolies in software to try to move into new markets such as search and music Google focused on being quick efficient and using the power of data analysis not human taste to make decisions and get ahead of would be rivals With exclusive information from interviews with people such as Don Norman former VP of Apple Computer and Pieter Knook former SVP of the Mobile Communications Business at Microsoft and many more current

and former staff of the three companies including one person who has worked for all three Arthur also addresses what the inventors of the hard drive used in the iPod thought it would really be used for how Apple transformed the smartphone market which of Android or Apple that forced Microsoft to abandon Windows Mobile what happened to Microsoft's tablet plans and much more
