Grokking Relational Database Design Qiang Hao,Michail Tsikerdekis,2025-04-29 Grokking Relational Database Design introduces the core skills you need to assemble and query tables using SQL The clear explanations intuitive illustrations and hands on projects make database theory come to life even if you can t tell a primary key from an inner join As you go you ll design implement and optimize a database for an e commerce application and explore how generative AI simplifies the mundane tasks of database designs *Learning IOS Programming* Alasdair Allan,2012-03-23 With this guide you ll build several sample applications by learning how to use Xcode tools the Objective C programming language and the core frameworks **Scala:Applied Machine Learning** Pascal Bugnion,Patrick R. Nicolas,Alex Kozlov,2017-02-23 Leverage the power of Scala and master the art of building improving and validating scalable machine learning and AI applications using Scala s most advanced and finest features About This Book Build functional type safe routines to interact with

relational and NoSQL databases with the help of the tutorials and examples provided Leverage your expertise in Scala programming to create and customize your own scalable machine learning algorithms Experiment with different techniques evaluate their benefits and limitations using real world financial applications Get to know the best practices to incorporate new Big Data machine learning in your data driven enterprise and gain future scalability and maintainability Who This Book Is For This Learning Path is for engineers and scientists who are familiar with Scala and want to learn how to create validate and apply machine learning algorithms It will also benefit software developers with a background in Scala programming who want to apply machine learning What You Will Learn Create Scala web applications that couple with JavaScript libraries such as D3 to create compelling interactive visualizations Deploy scalable parallel applications using Apache Spark loading data from HDFS or Hive Solve big data problems with Scala parallel collections Akka actors and Apache Spark clusters Apply key learning strategies to perform technical analysis of financial markets Understand the principles of supervised and unsupervised learning in machine learning Work with unstructured data and serialize it using Kryo Protobuf Avro and AvroParquet Construct reliable and robust data pipelines and manage data in a data driven enterprise Implement scalable model monitoring and alerts with Scala In Detail This Learning Path aims to put the entire world of machine learning with Scala in front of you Scala for Data Science the first module in this course is a tutorial guide that provides tutorials on some of the most common Scala libraries for data science allowing you to quickly get up to speed building data science and data engineering solutions The second course Scala for Machine Learning guides you through the process of building AI applications with diagrams formal mathematical notation source code snippets and useful tips A review of the Akka framework and Apache Spark clusters concludes the tutorial The next module Mastering Scala Machine Learning is the final step in this course It will take your knowledge to next level and help you use the knowledge to build advanced applications such as social media mining intelligent news portals and more After a quick refresher on functional programming concepts using REPL you will see some practical examples of setting up the development environment and tinkering with data We will then explore working with Spark and MLlib using k means and decision trees By the end of this course you will be a master at Scala machine learning and have enough expertise to be able to build complex machine learning projects using Scala This Learning Path combines some of the best that Packt has to offer in one complete curated package It includes content from the following Packt products Scala for Data Science Pascal Bugnion Scala for Machine Learning Patrick Nicolas Mastering Scala Machine Learning Alex Kozlov Style and approach A tutorial with complete examples this course will give you the tools to start building useful data engineering and data science solutions straightaway This course provides practical examples from the field on how to correctly tackle data analysis problems particularly for modern Big Data datasets __Data Science Jobs__ Ann Rajaram, Want a high paying career in the exciting field of DataScience This is the ONLY book that will help you land a lucrative Analytics job in 90 days or less This book is the perfect guide for you if you fall into any of these categories

You recently completed a masters degree or online course or bootcamp and want to get hired quickly as a Data Scientist Data Analyst Data Engineer Machine learning engineer or BI developer Looking to start a career in data science but unsure where to start You are an experienced tech professional but looking to pivot into analytics to boost your salary potential Tired of applying to dozens of jobs without getting a positive response and or final job offer F1 visa STEM OPT CPT students will also find this book helpful to land a job in this lucrative field The book will teach you proven successful strategies on Winning Profiles Turbocharge your resume and LinkedIn profile and start receiving interview calls from hiring managers Let JOBS CHASE YOU instead of the other way around LinkedIn A dedicated chapter on LinkedIn that teaches you some creative and SECRET ways to leverage the site and identify high paying jobs with low competition Niche sites A full list of niche job boards that other candidates have overlooked These sites have high jobs but lesser competition than the popular job search sites Upwork Contrary to popular opinion Upwork can help you make in data science jobs Learn proven techniques to help you bag contracts and start earning as quickly as next week 100 interview questions asked in real life data scientist interviews Other learner resources and much more Author is a practicing analytics professional who has worked in Fortune500 Firms like NASDAQ BlackRock etc Unlike most job search books that are written by recruiters or professors this book is written by a senior professional who rose quickly from analyst to managerial roles She has attended interviews of her own and knows clearly the frustrations and at times hopelessness of the job search process The systems in this book have successfully helped dozens of job seekers and will work effectively for you too Read on to launch your dream career Note this book is deliberately kept short and precise so you can quickly read through and start applying these principles instead of sifting through 500 pages of fluff This book includes Data Science interview questions and answers Help preparing for Machine Learning Interviews Top 25 Interview Questions for Data Analyst Scientist roles An in depth overview of Data Science Interview Process How to ace your interview even if you are an Entry level Data Analyst Data Scientist Data Science Interview questions for freshers How and Where to look for jobs and much more   *Core Java* Cay S.
